Conditions of Sale

Notes When Ordering

- Most seeds are treated for non-organic commercial growers: see price list for treatment options or visit www.stokeseeds.com.
- Prices are in U.S. dollars and must be payable in U.S. funds. All prices are subject to change without notice.
- \$250.00 minimum order amount required on the first order of the season.
- Quantities ordered must be in multiples of the minimum price level offered for that item.
- Please remember to sign and return the waiver/agreement forms in the back of the catalog for Attribute sweet corn and all watermelon purchases.

Payment Options

CASH/CHECK: A 1% discount is allowed on prepaid seed orders over \$500.00 if paid by cash, business or personal check, credit card, money order, cashier's check, or wire transfer.

Discounts are not allowed on freight charges. Prepayment discounts may not be applicable for all seed orders.

CREDIT CARD: We accept Visa, Mastercard and Discover.

C.O.D.: We do not accept C.O.D. (cash on delivery).

WIRE TRANSFER: A \$35.00 fee applies to each wire transfer payment received.

JOHN DEERE FINANCIAL (JDF): We accept JDF at the time of order. Please review the John Deere Financing section for details on program availability and limitations.

CREDIT TERMS: To establish credit terms, a credit application must be completed and submitted to our main office for review. To request a credit application, please contact customer service at (800) 962-4999 or email Customerservice.us@stokeseeds.com. Please allow a minimum of 2 weeks to process.

DUE DATES: Payment in full is expected on or before the due date indicated on the invoice, not from the statement date.

PAST DUE ACCOUNTS: Past due accounts will be charged a late payment fee of the lesser of 2% per month (minimum \$3/month) or the maximum amount allowed by law.

RETURNED CHECKS: A fee of \$40.00 will be charged for any returned checks. Collection fees and/or legal expenses, including costs of any lawsuit, will be charged to any overdue/past due accounts to the extent permitted by law.

TAX: We currently require customers in the following states to remit tax with their order: NY, NJ, MI, MO, PA, WI, IN and GA. It may be necessary to charge tax in other states without notice.

John Deere Financing

Financing Programs and Availability:

Availability

November 1, 2020-December 31, 2020

January 1, 2021-February 28, 2021

March 1, 2021-April 30, 2021

May 1, 2021-August 31, 2021

Program

Prime* - 1%, No Payments until December 2021

Prime*, No Payments until December 2021

Prime* + 2%, No Payments until December 2021

Prime* + 6.95%, No Payments until December 2021

*These are variable rate programs based on the Prime Rate, which was 3.25% as of 10/01/20.

Please note the following details about JDF programs and orders:

- Initial order must total \$1,000.00 or more. If a JDF order is canceled, a 10% cancellation fee applies.
- JDF orders are not eligible to receive discounts.
- You must have a JDF Preferred Account with Special Terms Financing to be eligible.
- To apply for a JDF account, apply online at: <https://www.deere.com/en/finance/financing/application/multi-use-account/> or call (800) 356-9033. Please indicate that you need a Special Terms credit limit and let them know an anticipated crop input budget. After application, accounts will need to be verified by a John Deere Equipment dealer with two forms of identification before you can utilize your account.

Shipping

STANDARD: Seed orders with a value over \$500 are shipped free of charge for standard shipping in the continental United States. Freight charges will apply outside these areas. Orders with a value under \$500 will be charged \$10 for Packaging and Handling.

EXPEDITED SHIPPING: Freight charges will apply to orders for any expedited shipping requests such as: next day air, 2nd day air, or 3rd day select.

PALLET FEE: A \$12.00 per pallet fee will be applied to orders shipped by LTL truck.

DAMAGED SHIPMENTS: Only a small percentage of material is damaged during shipping, but be prepared to take action in order to receive proper credit or replacement. Customer Service will assist you by filing a claim with the freight company and will need accurate information. Please observe the following steps (exactly and promptly) to have your claim accepted.

1. Take time when unloading. Count the pieces. Look for any damaged goods. Ask your driver to note any shortage or damage on all copies of the freight bill and sign driver's name clearly...no initials.
2. Immediately contact our main facility (800) 962-4999 and send a copy of the freight bill (with damage noted) within 10 days.
3. Enclose a note indicating the name and quantity of each variety that is missing or damaged.

Seed Returns

All returns must be authorized by our main office for your account to receive credit. We have no control over the environment in which the seed is stored after leaving our premises. For the protection of all of our customers, we will not accept seed returns for any reason other than an error on our part in filling your seed order (please contact us at (800) 962-4999 within 10 days). Opened containers cannot be returned for any reason. Stokes Seeds reserves the right to charge a 15% restocking fee plus freight if we accept any seed returns that were not an error on our part.

Variety Descriptions and Illustrations

Variety descriptions within this catalog have been prepared as a guideline only. They are given for comparison purposes to help growers plan a crop planting program and can be expected to vary in some degree depending upon geographic location, soil type, climatic conditions, and cultural practices. The information on relative maturity expressed as "days from direct seed" (DS) or "days from transplant" (TP) and is given only as a guide, as the actual maturity may vary considerably with conditions. Variety illustrations in this catalog are the result of favorable growing conditions and identical results are not guaranteed. Color illustrations may not be 100% accurate, due to color translation from the original photograph to film to print, and due to different light sources at the time the photographs were taken.

Please note that the sale of Harris Moran, Seminis and Syngenta products are restricted by geography and cannot be sold in all US areas, please consult customer service or your Stokes Seeds territory manager.

Substitutions

All items offered are subject to crop failure, shortages or other causes beyond our control. We will send the closest available substitute to complete your order unless you advise us otherwise.

FRENCH FILET BEANS

Item#	Variety	Relative Days (DS) ▼	Length, Shape	Seed Color, Pod Color	Sieve Size	Resistance/Tolerance	Features
0160179	DW 630 (Yellow)	56	4.5-5.5", Round	White, Yellow	2	BCMV _(IR) , Cl _(IR) , Pss _(IR)	High yield potential with great taste and a good disease package. Excellent heat tolerance with a 2 sieve size.
0160177	GRENADA	58	6.5", Round, Slender	White, Dark Green	2	BCMV _(IR) , Cl _(IR) , Psp _(IR) , Pss _(IR) , Ua _(IR)	A true 2 sieve size French filet with long, thin pods. Seed development is slow and has a long shelf life. Excellent disease package.

GREEN BUSH BEANS

Item#	Variety	Relative Days (DS) ▼	Length, Shape	Seed Color, Pod Color	Sieve Size	Resistance/Tolerance	Features
0160153	BA0999	50	5.5", Round	White, Medium Green	5-6	BCMV _(HR) , Pss _(IR)	An excellent medium green, 65% - 1 to 4; 35% - 5 to 6 sieve, mechanical harvest Storm type for first early sowings only. High yield potential and broad regional adaptability. PVP
0160185	DESPERADO	53	5.3", Round	Brown, Medium Green		BCMV _(HR)	Robust variety producing high yields of high quality straight pods. Pod pubescence protects against wind scar and thrips damage. Excellent vigor and well adapted for heat and stress tolerance.
0160033	JADE	53-60	5-7", Round	White, Dark Green		BCMV _(IR) , BCTV _(IR) , Ua _(IR)	Beautiful dark green color and exceptionally sweet flavor and tenderness. Upright structure minimizes curling and tip rot.
0160006	BRONCO	53	5.5", Round	White, Medium Green	5	BCMV _(HR)	Popular fresh market, long distance shipper. Round, straight pods are medium green.
0160189	COLTER	53	5.5", Round	White, Medium Dark Green	3-4	BCMV _(HR) , BCTV _(HR) , Ua _(HR)	Upright vigorous plant with excellent root system. Medium dark green straight round 3-4 sieve pods hold well in the field. Consistent set, reliable yields. Patented variety.
0160182	LEWIS	53	5.5", Round	White, Medium Dark Green	3-4	BCMV,US1 _(HR) , Pss _(HR) , Psp _(HR) , BCTV _(HR) , Ua _(HR)	Medium dark green, straight pods, 3-4 sieve on upright plants offer high pod placement for easy harvesting. Large yield potential. Patented variety.
0160110	VALENTINO	53	5.5"-5.75", Round	White, Dark Green	3	BCMV _(HR) , Ua:38,90 _(IR)	High quality, low fiber, 3 sieve Grenoble type. Straight dark green pods are well positioned on the plant and set well in hot weather. PVP
0160157	SV1137GF	53	5.5", Round	Medium Green	3-4	AE _(HR) , BCMV _(HR) , Cl:55 _(HR)	High pod placement, upright plant with excellent medium green straight, 3-4 sieve pods. Good yield potential. PVP
0160199	LASALLE	54	5.5", Round	Dark Green	3-4	BCMV _(HR) , Pss _(IR) , Psp _(IR) , Xap _(IR)	High yielding, dark, easy to harvest 3-4 sieve bean with consistent yields. Good heat tolerance.

GREEN BUSH BEANS

Item#	Variety ▼	Relative Days (DS) ▼	Length, Shape	Seed Color, Pod Color	Sieve Size	Resistance/Tolerance	Features
0160067	STRIKE	54	5", Round	White, Medium Green		BCMV _(HR)	Continuous setting feature protects grower from stress, better than concentrated set types. High yield potential. PVP
0160186	WYATT	54	5.7", Round	White, Dark Green	4	BCMV _(HR) , BCTV _(HR) , Pss _(IR) , Psp _(IR) , Xap _(IR)	Early upright plant with high pod set for harvest. Dark green, 4 sieve pods. Processing. Patented variety.
0160008	BUSH BLUE LAKE 274	55	6", Round	White, Dark Green		BV-1; NY-15.	Unique flavor and slow fiber and seed development in the pod make this strain popular for fresh market or processing. Dark green, round pods on dwarf bushy plants.
0160201	OAKLEY	55	4.5", Round	White, Dark Green	2	BCMV _(HR) , BCTV _(HR) , Ua _(HR) , Psp _(IR) , Pss _(HR)	Upright plants carry dark green 4.5" 100% 2 sieve pods well off the ground. Very uniform, outstanding flavor, texture. Some HB tolerance. Patented Variety.
0160203	PIKE	55	5.25", Slim	Medium Dark Green	3	BCMV _(HR) , BCTV _(HR) , Psp _(IR) , Pss _(IR) , Xap _(IR)	Dark green, 3 sieve very straight and slim pods. High yielding erect plants provide excellent machine harvest ability. Determinate plant has a vigorous, strong root system. Patented variety.
0160011	GREEN CROP	55	7.5-8.5", Flat, Broad	White, Medium Green			Excellent flavor. A bush version of Kentucky Wonder.
0160170	AFFIRMED	56	5.1", Round	Medium Green	3-4	BCMV _(HR) , CI _(HR) , Psp _(1,2 HR) , Pss _(IR)	Straight medium green pods with an 80% 3-4 sieve size. The plant sets well, upright off the ground. It has a high yield potential and holds well in the field.
0160191	ALDRIN	56	5.25", Round	Dark Green	4	BCMV _(HR) , BCTV _(HR) , Ua _(HR)	High quality, dark green glossy very straight pods. Upright plants set pods mid-high to keep bean tips well off the ground during mechanical harvesting. High yield potential.
0160193	BOWIE	56	5.5", Round	White, Medium Dark Green	4	BCMV _(HR) , Pss _(HR) , Psp _(HR) , BCTV _(HR) , Xap _(IR)	Uniform dark green color, straight pods. Upright plants are easy to harvest, 60%; 4 sieve. Patented variety.

SPECIALTY BEANS

Item#	Variety	Relative Days (DS) ▼	Length, Shape	Pod Color	Sieve Size	Resistance/Tolerance	Features
0160017	THOROGREEN BUSH (Lima)	67	3", Flat	Light Green			Baby lima. Excellent canning and freezing variety.
0160106	TEGGIA (Borlotto)	68	7", Flat	Buff/Red		BCMV _(HR) , Ua _(HR)	An improved Volcano type with better yields and red/yellow pods with contrasting colors at full maturity. Bushy plant without runners.
0160016	FORDHOOK 242 (Lima)	70	3.5-4", Thick, Broad	Medium Dark Green			A major player in the hand-harvest lima market. Good pod set.
0160132	VROMA (Broadbean)	82	7-9", Round	Green	4-5		This superior variety is earlier maturing and better yielding than Broad Windsor with better quality than Aquadulce. Large pods, with an average of 4-5 seeds per pod. Exclusive.

EDIBLE VEGETABLE SOYBEAN (EDAMAME)

Item#	Variety ▼	Relative Days (DS)	Plant Height	Bean Size	Color	Features
0160097	BESWEET 2001	94	24"		Yellow/Green	One of the best flavored varieties of food grade edible soy beans. Plants produce extra-large greenish yellow beans. Very high soluble sugar (brix) averaging 13.2%.

Vroma

Besweet 2001

Cruiser provides effective early season insect control when the plants are small and hard to spray effectively with foliar materials. Cruiser is effective against seed-attacking pests, such as wireworms and seed corn maggots, as well as above-ground pests such as bean leaf beetle, aphids, and leafhoppers. Cruiser provides effective control of potato leafhoppers and early season control of bean leaf beetles.

Cruiser will not protect against pod-feeding insects such as European corn borer or corn earworm. Bean leaf beetle and thrips feeding on blossoms or pods will not be controlled by Cruiser seed treatment. Thus, a normal insecticide spray regimen to protect pods is recommended even if Cruiser is planted.

CABBAGES (HYBRID & OPEN POLLINATED)

Item#	Variety	Relative Days (TP) ▼	Appearance	Size, Shape	Uses	Resistance/Tolerance	Features
0250183 	SUPERSTAR (Hybrid)	Mid-Late	Green	Medium Large	Fresh Market, Processing	Foc _(IR) , Xcc	A very high quality fresh market mid-season green cabbage. It has excellent wrappers for a fancy pack along with excellent holding ability in the field and after harvest.
0240012	CHARMANT (Hybrid)	65	Dark Green	Round	Fresh Market	Foc _(IR) , TB _(T)	Early season hybrid. A more upright plant habit allows closer spacing and higher yields per acre. Dense heads form slowly for extended cutting periods of 16's and 12's.
0250169	GOLDEN ACRE (O/P)	65	Light Green	2.75-4 lbs., Round			Standard strain for bedding plant sales. Plants have a fair wrapper leaf, heads are round and average 5.5-6" in diameter. No Yellows tolerance.
0240065	QUICK START (Hybrid)	65	Dark Green	6-7", Round	Fresh Market	Foc _(IR)	Early maturing solid heads with a short core. Holds well in the field.
0250114	EARLY THUNDER (Hybrid)	74	Blue/Green	Round	Fresh Market, Processing	Foc _(IR) , Xcc, TB _(T)	Excellent holding ability in the field, plants are blue/green in color, medium size, upright and slow bolting. Nice round heads, mild texture and taste.
0250159	GREGORIAN (Hybrid)	73	Green	6.5 lbs., Round	Fresh Market, Processing		Uniform, early maturing with good field holding ability and dependability. Well suited for fresh and processing markets.
0250209	ACCLAIM (Hybrid)	75	Blue/Green	Large, Round	Fresh Market	Foc _(IR) , Heat _(T)	Large, solid, uniform heads. Works best in the spring slot. Widely adapted.
0250013	BLUE DYNASTY (Hybrid)	75	Slate Blue/Blue-Green	3-4 lbs., Round		Foc _(IR) , Xcc	Excellent green fresh market or shipper cabbage, very uniform blue/green round head - holds well in the field.
0240017	BLUE VANTAGE (Hybrid)	76	Blue/Green	6.75", Round	Fresh Market, Slaw	Foc _(IR) , TB _(T)	Widely adapted in warmer regions. Slow bolting. Solid, uniform heads, erect frames.
0250192	TOPMA RZ (Hybrid)	80	Blue/Green	3.5 lbs., Round	Fresh Market	Foc _(IR)	Medium height compact, strong framed blue-green plant has good wrapper leaves. Waxy green round head has short cores.

STORAGE CABBAGES (HYBRID)

Item#	Variety	Relative Days (TP) ▼	Appearance	Size, Shape	Resistance/Tolerance	Features
0250229	RONDALE (Red)	75	Dark Red	4 lbs.	Foc, TB	Uniform plants have good wrapper leaves Dense heads have short cores. Easy to harvest, producing good tonnage.
0250014	RED DYNASTY (Red)	76	Dark Red	3.25-5 lbs., Oval/Round	Xcc, TB	An excellent fresh market red with additional resistances to Black Rot and Tip Burn. Medium sized heads have very uniform plants.
0250228	MULTIKEEPER	86	Green		Foc _(IR) , Xcc	Short term storage type - can also be cut earlier for early Sept. fresh market 16's or Oct. kraut or storage purposes. Good tolerance to tip burn and splitting. Exclusive. Black Speck and Thrip resistant.
0250189	STORAGE #4	95	Dark Green	Medium Large, Round	Foc _{1(HR)}	Excellent yielding and widely adapted with great holding ability. Works great in the late fall for fresh market, especially in rainy conditions. Due to its earliness when used for storage, recommended for later season plantings.
0250222	ADAPTOR	95	Blue/Green		Foc _(IR)	Great late season, high yielding cabbage. Round 6-8" heads result in great looking pack appearance.
0250223	DECURION	110	Blue/Green	3-11 lbs., Round	Foc _(IR)	Early main season very solid compact plant is easy to harvest. Excellent solid white interiors and good long storage.
0250225	HAZELTON	120	Green	4 lbs.	Foc	Round easy growing cabbage suitable for long storage. Strong thrips resistance and high resistance to Basal Rot.
0250188	SATIE	120	Blue-Green	4.4-6.6 lbs., Round	Foc _(HR) , Xcc _(IR)	Late white cabbage with uniform heads perfect for fresh market. Long storage suitable for growing conditions like hot continental summers.
0250158	MUCSUMA RZ	125	Green	6-11 lbs., Round	Foc _(IR)	Extra-large green heads with large frame. Plants are upright, heads are very dense with long term storage and great holding capacity. High yield potential.

GREEN FLAT CABBAGE (HYBRID)

Item#	Variety ▼	Relative Days (TP)	Appearance	Size, Shape	Resistance/Tolerance	Features
0250182	SHOSHUDORI	60	Green	4-5 lbs., Flat	Cold _(T) , Heat _(T)	Great for early slot with strong disease resistance and tolerance to both cold and heat. Widely adapted. Very good tasting flat shaped head.
0250122	O-S CROSS	80	Medium Green	5 lbs., Flat/Drum Head		Unique flat or drum head type without large central leaf veins. Plants are heat tolerant. Tolerant to premature bursting in the fall. Harvest in late September. Large thin veined leaves are easily rolled for cabbage roll production.

NAPA CABBAGES (HYBRID)

Item#	Variety	Relative Days (TP) ▼	Appearance	Size, Shape	Resistance/Tolerance	Features
0240049	BLUES	57	Medium Green, White Interior	4.5 lbs., Barrel	Hb, Xca, Xcc	F1 Hybrid. Heads average 10" are barrel-shaped. Use for spring or fall harvests. Extra-slow bolting.
0240081	YUKI	67	Bright Green	4-5 lbs., Barrel	Pb _(IR) , TB _(T) , Xca _(IR)	Good uniformity and size with some tolerance to pepperspot and resistance to clubroot.
0250092	NORANG BOM	70	Green, Yellow Interior	5 lbs., Blocky	Hb _(IR)	Excellent quality and superior results in the difficult cool/warm harvest period when other varieties may bolt. Vigorous growing with good heading ability. Replaces Spring Flavor!
0250184	SPRING CRISP	75	Dark Green, Bright Yellow Interior	5 lbs., Barrel	Pb _(IR)	Increase yield potential with excellent field holding ability and less susceptible to internal black specks. Good bolting tolerance with harvest flexibility. Suitable for harvest late spring to late summer.

PAK CHOI CABBAGES (HYBRID & OPEN POLLINATED)

Item#	Variety	Relative Days (DS) ▼	Appearance	Features
0250129	TOY CHOY	30	Dark green leaves, white petioles, tiny erect plant.	Mini baby pak choi. Performs well in dense plantings and heat. Tender leaves, excellent flavor.
0240058	MEI QING CHOI	35-40	Green Petioles, Miniature Type, Tight Vase-Like Shape	Vigorous early growth with uniform maturity. Good heat and cold tolerance, slow bolting. Easy to grow.
0250234	BOPAK	40	Dark green leaves, white petiole, erect.	Erect plant for bunching without breaking. Bolting tolerant. Untreated seed.
0250236	WHITE TROPICAL CHOI (O/P)		Dark green leaves, white petiole, erect.	Beautiful thick, crisp and pure white petioles are a striking contrast to the smooth, rounded deep-green leaves. Performs well in warmer climates.
0240036	JOI CHOI	55	Glossy, Dark Green, Erect, Broad White Stalks	Uniform and slow bolting. Well adapted with high yield potential.

Bitter Gourd Long Thick

Kyoto Mizuna

Orient Wonder Yard Long

Red Garnet Amaranth

SPECIALTY & ASIAN GREENS (OPEN POLLINATED)

Item#	Variety ▼	Resistance/Tolerance	Features
0190109	BITTER GOURD LONG THICK		Extra-long 8-12" fruit with dark green skin and white flesh that should be harvested young and green for best eating. Plant produces many branches.
0190040	KYOTO MIZUNA (Mustard Spinach)	Cold _(n)	This easy-to-grow gem grows very quickly, has mild flavor and is perfect for salad mixes. Very attractive, narrow leaves are deeply serrated and fringed. Can be grown to full size rosettes at 8" spacing.
0160207	ORIENT WONDER YARD LONG		Asian Pole bean. Extra-long 18", slender dark green, smooth pods are slow to form seeds. This provides lots of tender, stringless, richly flavored beans over a long harvest window in cool, dry climates.
0190027	RED GARNET AMARANTH		Attractive flowers and red leaves make this amaranth not only edible, but beautiful as well! Young leaves can be used for greens, or let go to seed and harvest for grain. Plants grow 6-8 feet tall.
0190047	REDLINE MIZUNA (Mustard Spinach)		A unique red mizuna with characteristically distinct mizuna flavor. Red color and serrated leaves enhance eye appeal to all salad blends.
0420047	SHOYA LONG		Extra-long 10-15" purplish-black fruit with a purple calyx. High percentage of first grade, fine quality fruit.
0190008	TATSOI (Mustard Spinach)		Spoon-shaped, thick, very glossy, deep green leaves suitable for bunching. Compact, rosette plants. Popular ingredient in fancy salad mixes.

CAULIFLOWER (HYBRID)

Item#	Variety	Relative Days (TP) ▼	Head Type	Plant Type	Harvest Season	Features
0300002	SNOW CROWN	48	Semi-Dome	Vigorous, Uniform	Early Summer, Fall	Well rounded solid white heads average about 2 lbs and measure up to 7.5" across with good depth.
0300068	FUJIYAMA	60-65	Dome	Medium	Summer	Heat tolerant variety opens a new harvest slot for cauliflower. Plant in June as it needs the heat of summer to build a big plant in order to produce good-sized heads for August harvest.
0300014	CANDID CHARM	65	High Dome	Large, Semi-Erect	Spring, Fall	Widely adapted, easy to grow. Concentrated maturity. Heavy, attractive heads. Warm to cool harvest.
0300049	STEADY	65	Dome	Medium-Large	Summer	One of the earliest varieties that still has self wrapping tendencies. Excellent flavor!
0300053	FREEDOM CMS	66	Dome, Dense	Self Wrap		CMS breeding assures less chance of inbreeds and increases overall uniformity. Snow white heads are very uniform to harvest.
0300080	WHITE SAILS	68	Extra-Large, Dome	Self Wrap	Late Main	High yields of extra-large 7.5" heads for processing. Some resistance to internal black speck. Exclusive.
0300073	AQUARIUS	70	Dense	Erect, Self Wrap	Summer	Uniform, high quality white, smooth, firm, heavy curds. Very tolerant to heat and curd hairiness.
0300032	SYMPHONY	70-75	Semi-Dome	Moderately Upright, Vigorous	Late Summer, Fall	Tight, protective inner wraps help boost packouts of excellent quality, dense white heads.
0300070	APEX	71	Large, High Dome	Self Wrap	Main, Fall	Concentrated maturity, very uniform dense pure white heads are very heavy. For shipping, fresh market or processing.
0300078	SYNERGY	75	Dense	Vigorous, Upright	Summer	Outstanding firm white curd quality, short harvest period. Fresh market.
 0300069	TWISTER	75-80	Heavy-headed, Medium Large	Medium	Spring, Fall	Heads are tight, heavy and bright white with a fabulous spiraling internal wrap. Very uniform harvests. Well adapted to most areas. Prefers heavy soil.
0300039	CASPER RZ	76	Large, Dense	Vigorous, Self Wrap	Late Summer, Fall	An excellent processing hybrid. The large smooth white curd has very good processing weight and excellent color. Tip burn resistant.
0300055	SIERRA MADRE RZ	80-90	Large, Dense	Medium, Self Wrap	Late Spring, Summer, Fall	Very large, dense and white colored head. Self wrapping plant. Ability to tolerate hot harvest conditions.

CELERIAC (HYBRID & OPEN POLLINATED)

Item#	Variety ▼	Root	Root Color	Features
0320004	CISKO RZ	Bulbous	White	Very productive and free from anthocyanin. White bulbous root is firm with a strong celery taste, high dry-matter content, and small cavity. Roots are concentrated underneath for easy cleaning. Suitable for long storage and fresh market.
0320003	REX (Hybrid)	Smooth	Smooth	Vigorous root is easy to clean. Drought tolerant with high yield potential. Use for fresh market, processing or storage.

CELERY (HYBRID & OPEN POLLINATED)

Item#	Variety ▼	Relative Days (DS)	Color	Resistance/Tolerance	Features
0340040	COMMAND	100	Dark Green	Foc _(T) , Bolt	A tall fresh market celery with reduced suckering. Bunches are compact and blocky with good petiole length. Patented Variety. PVP
0340043	TZ 6200 (Hybrid)	100	Dark Green	Foc _(T) , Bolt	Petioles have excellent color, texture and taste with consistent count and yield. Main season variety.

CHICORY (OPEN POLLINATED)

Item#	Variety ▼	Features
0360021	CICORIA CATALOGNA	Dark green leaves 12" long and 3" wide are deeply notched, with light green petioles. Both leaves and tender stalks are harvested in spring.
0360013	GIANT CATALOGNA	A larger framed, more voluminous, improved Catalogna type chicory. Also known as Italian dandelion.

COLLARDS (HYBRID & OPEN POLLINATED)

Item#	Variety ▼	Relative Days (DS)	Plant Type	Height	Leaf Type	Features
0380008	HI-CROP (Hybrid)	Early to Mid	Medium Tall, Upright	18-26"	Savoy, Dark Blue-Green	Known for having large, heavy leaves, true blue-green color, and tasty, non-bitter flavor. Tolerant to heat and cold. Slow bolting.
0380011	TOP BUNCH 2.0 (Hybrid)	70	Upright	18-26"	Wavy, Lightly Savoyed	Early maturing hybrid that resembles Top Bunch with wavy, lightly savoyed leaves that regrow quickly after harvest. Suitable for fresh market and processing.
0380004	VATES	75-80	Upright	18-26"	Smooth, Green	Durable with heavy yields. Widely adapted.

- Sweeter taste
- Better tenderness
- Refined kernels
- Darker green husks
- Better shelf life
- Stronger plants
- Uniform plants

sh₂ Growing Supersweet Corn

MONITOR SOIL TEMPERATURE: sh₂ varieties generally do not exhibit cold tolerance. Avoid planting in soils below 60 degrees F (13 degrees C). Stokes Seeds cannot warranty supersweet corn seed planted in cold soil conditions.

GERMINATION: Seed of supersweet corn does not generally have the germination vigor of other types of sweet corn seed. Seed for supersweet corn must absorb twice as much water as normal corn to germinate. For strong, even emergence, prepare a smooth, adequately moist seed bed and plant about 1-1/2" deep. sh₂ varieties are generally planted about 1-1/4" deep. Moisture extremes should be avoided.

ISOLATION: To prevent starchy, tough kernels, isolate supersweets from sugar enhanced (se) types of corn by at least 25 ft. in home garden and 100 ft. in acreage plantings. Isolation can also be achieved by timing. A 10 day minimum difference is needed between the sum of planting date difference and maturity difference. This prevents significant amounts of cross-pollination.

An Attribute® Stewardship Agreement is required to purchase all Attribute® sweet corn varieties, sign digitally on AgCelerate.com. The Remedy Supplemental Agreement is required for Remedy purchases of 100 M or more, see page 110.

Performance Series® is the brand name given to Seminis® products that have been developed to deliver the highest level of innovation, value, and reliability available in the vegetable seed market. These seed products were created for growers seeking breeding innovations and technologies that can help maximize their growing potential. The brand's ground-breaking attributes can help growers get the most potential out of every seed and achieve improved levels of performance

As weed management has become increasingly complex, the LibertyLink system is a simply better solution to combat missed weeds. The LibertyLink system couples high-performing genetics with Liberty's superior weed control on tough-to-control and resistant weeds for high yields that deliver.

ORNAMENTAL CORN (HYBRID & OPEN POLLINATED)

 = These items can be used as popcorn.

Item#	Variety	Relative Days ▼	Ear Length	Features
0070095	PAINTED MOUNTAIN	85	7"	Bred for short season, cold soil areas. Multicolored kernels contain soft starch which produces corn flour and hominy. Very hardy, beautiful colors.
0070002	FIESTA (Hybrid)	90	9-10"	Early maturing, full-sized hybrid with various tones of blue, red, yellow and white.
0070083	 CHERRY BERRY (Mini)	98	3"	Larger, longer ears than standard strawberry popcorn making for a good pack out. Husk colors are a mixture of beige, burgundy, reds and streaked. 5-6' stalk height with good standability.
0070089	 STRAWBERRY DE-LITE (Mini)	98	3"	Larger, longer ears than standard strawberry popcorn which makes for a good pack out. A mix of colors great for fall decorating. Fantastic yields! Machine pickable.
0070079	 RED HUSK SPECTRUM (Mini)	100	6"	Unique with a high percentage of red stalks and husks. Has a strong stalk 8-9 feet tall and stands well late in the season. Improvement to the standard Carousel.
0070055	 BROOM CORN MIXED COLORS	105		A blend of deep brown, rust, copper and wheat foliage colors which can be used to make pioneer brooms or rustic wreaths.
0070067	 GORGEOUS INDIAN (Hybrid)	107	8.5-9"	The name says it all! Gorgeous, glossy kernels with breathtakingly beautiful color. Sturdy plant. Very high production of large, uniform ears.
0070011	AMERICAN WAY	115	10-13"	A BIG Indian corn with 12-14 row count on tip-filled ears! Excellent yields of consistently beautifully colored ears that sell fast! Exclusive.

ORNAMENTAL CORN (OPEN POLLINATED)

= These items can be used as popcorn.

Item#	Variety ▼	Relative Days	Ear Length	Features
0070060	BLOODY BUTCHER	110	8-12"	Deep red with some darker red kernels.
0070001	CAROUSEL (Mini)	110	4"	Miniature ears with colorful kernels.
0070077	SHADES OF BLUE (Mini)	110	3.5-4.5"	Absolutely stunning! Deep blue kernels with occasional lighter blue kernels for contrast. 3.5-4.5" ears with red and white husks! Also used as a colorful novelty popcorn.

POPCORN (HYBRID)

Item#	Variety ▼	Relative Days	Features
0080064	128YH (Yellow)	Midseason	YH denotes Yellow Hulless. An exceptionally good eating corn with a minimum of hull. Tall plant stands well with 7-8" ears, some may be doubles. High quality, high yield!
0080065	R400MR (Yellow) (Mushroom)	103	Confectionary style corn with extra large kernels. Popped kernels are mushroom style which makes the flakes more resistant to breakage. Use only for caramel corn!
0080068	ROBUST 98114W	108	This mid-season white hybrid is 6' tall, has large long thin ears and a high yield potential. Nearly hulless this popcorn has great eating quality, crisp tender and flaky. Isolate from sweet corn.

Sweet Corn**

Gourmet Sweet™ Brand Flagler

High quality ear, strong plant with broad adaptation and good stress tolerance.

Gourmet Sweet™ Brand Anthem XR

Great eating quality, tender and sweet. Excellent yield and tip fill. Perfect for shipping or fresh market.

Gourmet Sweet™ Brand Signature XR

Attractive husk, excellent holding ability in the field, strong husk cover, great ear size and good flavor.

Gourmet Sweet™ Brand Nirvana

High yielding with uniform, full tipped ears that have good kernel contrast and rowing.

Gourmet Sweet™ Brand Vision MXR

Large, thick, cylindrical ears have blunt, rounded tips and medium dark green husk cover.

Gourmet Sweet™ Brand Resolve VX

Excellent eating quality with great virus resistance. Works for shipping and local markets.

Barkant

Caliente™ Brand Nemat

Caliente™ Brand Rojo

Tillage Radish

COVER CROPS (OPEN POLLINATED)

Item#	Variety ▼	Features
0190093	BARKANT (Forage Turnip)	Leafy, nutritious annual brassica that is very palatable to all classes of livestock. Excellent multiple-graze forage with high yield that provides excellent feed value. Seed 3-5 lbs. per acre.
0190041	CALIENTE™ BRAND NEMAT (Arugula)	High glucosinolate producing arugula that is an excellent trap crop for root knot and sugar beet cyst nematode. Shows good disease and weed suppression also. Plant in spring, summer, or fall. Very cold and drought tolerant. Over-winters in many Northern climates in the rosette stage. Mowing at bloom maintains cover for longer periods, improving nematode trapping potential. Can be utilized in vineyards and orchards. Seeding rate: 5-7 lbs. per acre.
0190101	CALIENTE™ BRAND ROJO (Mustard)	Distinctive mustard with purplish/red leaves and the highest glucosinolate production currently available. Vigorous growth with high leaf biomass and an extensive root system. A good choice for organic or conventional growers with high disease and/or nematode pressure. Seeding rate: 8-10 lbs. per acre.
0800084	TILLAGE RADISH	Tillage Radish® drills down where steel cannot reach, it tills the soil naturally and better than any tillage equipment possibly can. Easy to plant, reaching full growth within 30 days. Taproot typically reaches over 30". Rapid spring decay results in massive soil voids for air and water movement. Improves drainage and air movement and helps suppress nematodes. Shades out winter annual weeds with dense foliage cover. Drilling: (7.5" rows), 6 lbs/acre. Broadcast / Aerial: 8-10 lbs/acre. Precision Planting (15" with 4" in-row spacing): 4 lbs/acre. For Forage: Increase drilling rate to 8-10 lbs. per acre.

Improve Soil Quality and Reduce Your Reliance on Chemicals for Disease, Weed, and Nematode Control

Caliente™ Brand Mustard and Nemat Arugula have the genetic potential to produce large quantities of biomass and high yields of suitable glucosinolates that help in the reduction of fungi. Additionally, it acts as a trap crop, which has been shown to reduce nematode populations. Caliente™ Brand Mustard and Nemat Arugula can improve soil health and productivity by:

- Increasing water penetration
- Reducing wind erosion
- Reducing compaction
- Increasing beneficial organisms
- Increasing water holding capacity

Caliente™ Brand Mustard and Nemat Arugula used in an integrated pest management program can reduce or eliminate pressure from many crop pests:

- Reduce disease pressure: verticillium, pythium, fusarium, rhizoctonia sclerotina, aphanomyces, take-all and others
- Reduce weed pressure: suppresses many annual weeds
- Reduce nematode populations: effective on many problem species

The Only Cover Crop Radish Proven to Increase Yields

Sometimes referred to by cheap imitators, Tillage Radish® is the only cover crop radish proven to boost crop yields while delivering other measurable soil benefits while avoiding many problems traditionally associated with cover crops.

It's the taproot!

The superior genetics behind this amazingly aggressive brassica taproot are found only in the Tillage Radish®. No other cover crop radish has a taproot that drills through compaction like it's not even there. In fact, that's how this amazing cover crop got its name. Tillage Radish® drills down where steel cannot reach, it tills the soil naturally and better than any tillage equipment possibly can.

- Easy to plant, reaching full growth within 30 days
- Taproot typically reaches over 30" – deeper depending on soil and planting conditions
- Drills through soil compaction that stops other cover crops cold
- Soaks up N, P, Ca and other key soil nutrients
- Winter kills when temperatures reach mid teens for a couple nights
- Rapid spring decay results in massive soil voids for air and water movement
- Spring soil warms up and dries quickly for better planting conditions
- Improves drainage and air movement
- Helps suppress nematodes
- Attracts earthworms like a magnet
- Shades out winter annual weeds with dense foliage cover
- Plant-available N released during radish decay
- N, P, Ca available when new plant seeds need it most

SLICING CUCUMBERS (HYBRID & OPEN POLLINATED)

Item#	Variety	Relative Days (DS) ▼	Habit	Fruit Length	Resistance/Tolerance	Features
0400103	DOMINATOR (Hybrid)	Early	Gynoecious	8.5"	Ccu _(IR) , CMV _(IR) , Co _(IR) , Pcu _(IR) , Psl _(IR) , Px _(IR)	Dominator is dark green with exceptional size and shape. Dependable, widely adapted to all growing areas. Outstanding quality, consistent production and high yields. Will dominate the market because it is that good. Exclusive.
0400050	TASTY GREEN (Hybrid Burpless)	Early	Monoecious	9"	Pcu _(IR) , Px _(HR)	Fine flavored burpless cucumber. Easy to grow even under adverse conditions. Dark green with faint ridges.

T = Treated with FarMore FI400, U = Untreated								

FarMore® FI400 fungicide/insecticide combination seed treatment technology helps maximize cucurbit vegetable production by enhancing performance and value.

Superior Disease Protection: Provides early-season protection against several diseases including Fusarium spp., Pythium spp., Rhizoctonia spp., and general damping-off and seedling blight.

Excellent Early-Season Insect Protection: Provides control against insect pests, including aphids, cucumber beetles, flea beetles, leafminers, seedcorn maggots, thrips, whiteflies, and wireworms.

 Look for this symbol in the pricing tables for FarMore FI400 treated varieties.

Recommended for high tunnel and low tech greenhouse productions.

EGGPLANTS (HYBRID)

Item#	Variety	Relative Days (DS) ▼	Shape	Size (WxL)	Plant Type	Resistance/ Tolerance	Features
0420036	CHARMING (Pink)	50-55	Slender, Long	2.2" x 7.4"	Medium Spreading		Similar color to Neon but longer. Medium-early, prolific, attractive, vibrant, purple-reddish fruits have tender white flesh.
0420047	SHOYA LONG (Asian)	55	Slender, Long	12" Long	Upright, Medium Tall		Dark purple, long, Japanese type eggplant. Early maturing, weighing about 1/2 lb. each. Excellent quality, uniform size, shape, and color. Replaces Millionaire.
0420008	MEGAL (Italian)	60	Elongated, Cylindrical	3" x 7-9"	Tall, Vigorous	TMV _(IR) , ToMV _(IR)	Early maturing italian type with green calyx and long thin, very dark purple fruit. Strong plant withstands frequent picking.
0420070	NANCY	64	Round, Globular	Silver Dollar	Compact		Mini eggplant, with a deep metallic purple color. Nancy boasts high yields with a nice compact habitat, suitable for growing on the patio or in pots. Great for pickling or pan frying.
0420069	PICASSO	65	Oval				High yielding purple-black fruit with a firm consistent shape and uniform color. High crown set for longevity in the field in hot conditions. Spineless green calyx.
0420027	NADIA	67	Oval, Long	4.5" x 9"	Vigorous		Very firm, attractive, purple-black fruits with long harvest period. Good setting in cool conditions.
0420056	NUBIA (Striped Italian)	68	Oval, Elongated	3-4" x 7-8"	Tall, Upright		Beautifully striped variegated Italian type with green calyx. A mellow, refined flavor perfect for grilling or frying. Productive and uniform fruits hold up well on a large, sturdy plant.
0420054	ARETUSSA RZ (White)	70	Oval	10.5 oz.	Vigorous, Open		Suitable for cultivation in heated or plastic greenhouses and open field. Uniform fruit with high yields. No spines on calyx. Suitable for Spring/ Summer and Winter cultivation.

LARGE GOURDS (HYBRID & OPEN POLLINATED)

Item#	Variety ▼	Features
0480007	APPLE	Apple-shaped gourd that sits 6.5" tall by 7" diameter.
0480028	AUTUMN WINGS LARGE (SWAN)	Long-necked, spoon shaped with wings and varied colors. Bulbs are 2.5-3" in diameter with necks 12" long. Unique!
0480015	BIRD HOUSE	Bulbous at the blossom end, the beginning of the neck is restricted, then flares out into a smaller bulb, forming the shape of a bottle. To form gourds that will sit on their bases, stand them upright while they are young and still growing.
0480061	CROWNS	Our largest ornamental gourd with wings. The perfect complement to Queens! Exclusive.
0480032	CUCUZZI SNAKE	Long, medium-green colored lagenaria gourd. About 2" diameter and 24" long. Grow on trellises for straight gourds, or grow on ground for "snakelike" curves.
0480017	DIPPER LONG HANDLED	This light green-colored gourd has a long handle on a 6-7" bulb.
0480064	GIZMO	Bush plant type, fruit with rich colors including dark green, orange, yellow, light green, and white. Hard-shelled fruit are 3-5" tall by 6-8" wide at the tip of the wings.
0480055	GOONIES (SUPER FREAK™)	SUPER FREAK™ gourd even larger than Gremlins! Extra-large, 8-12"+ in size with various solid and speckled vibrant colors in a multitude of shapes: stars, wings, acorns, mushrooms, necks and more! Exclusive.
0480024	SPECKLED SWAN	Like a birdhouse gourd, but with a long, gently curved neck that peaks in a small bulb to resemble a swan. Gourds are 14-18" long with a 6" diameter base.
0480044	GREMLINS (SUPER FREAK™)	These "Freaks of Nature" are beautiful. Large 5-7"+ in size with various solid and speckled vibrant colors in a multitude of desirable shapes; stars, wings, acorns, mushrooms, necks and more. Exclusive.
0480063	HARVEST FLOWERS (Hybrid)	Bright disc shaped fruits are multicolored. Bush habit allows for tighter spacing and good harvest of highly ornamental fruit.
0480053	LUNCH LADY	One of a kind large warted gourd blend. It produces an array of fruit sizes, shapes and colors, all with warts. A perfect fall novelty product for any grower.
0480060	QUEENS	Our largest gourd mix with even greater size potential than Goonies. Primarily long-necked types with speckled vibrant colors, wings and warts. Very eye catching!
0480006	TURKS TURBAN	Shaped like a turban, this edible gourd is streaked with orange, white, red and green.
0480049	YUGOSLAVIAN FINGER	Bush plant habit. Large white gourd with up to ten fingers on a fluted type acorn body. Edible and unusual ornamental, very rare.

SMALL GOURDS (OPEN POLLINATED)

Item#	Variety ▼	Features
0480026	AUTUMN WINGS SMALL	Shaped like a swan pear with many colors and wings. Intense colors. Bulbs are 2.5-3" in diameter with necks 4-5" long. Must be mature at harvest to avoid damaging wings.
0480027	AUTUMN WINGS MEDIUM	Fruit shaped like a spoon gourd with many colors and wings. Many have gradual shading between wings. Bulbs are 2.5-3" in diameter with necks 6" long.
0480048	DAISY	Small 3-4" wide and 2-3" tall multi-colored (yellow, green, orange, white) gourds. Most have warts with a unique shape resembling a daisy pattern on the stem end. Yields are increased if not over planted. Optimum spacing is 1.5-2' linear spacing on 5-6' center beds.
0480031	GOBLIN EGGS MIX	Delightful mixture of egg shaped gourds in a variety of colors and bicolors, averaging 2.5 x 3". Mix also includes Jack Be Little, Striped Crown of Thorns and Spoon. High yield potential.
0480025	SMALL WARTED INDY MIX	A wide range of interesting types, including warted spoons and fancy miniatures.
0480056	TEN COMMANDMENTS	Softball sized fruits have five pairs of protruding prongs that point towards the blossom end. Nice mixture of bright striped, mottled, multicolored fruits.
0480065	WEE WINGS	Adorable mix of colorful, winged, warted, and smooth gourds. Sizes range 2-6". Smallest mix on the market! Perfect for tabletops or other smaller displays. Exclusive.
0480059	WITCH'S BREW	Unique, colorful, and interesting blend of warted and smooth gourds. Includes many different shapes and color patterns.

Arugula, Astro

Basil, Eleonora

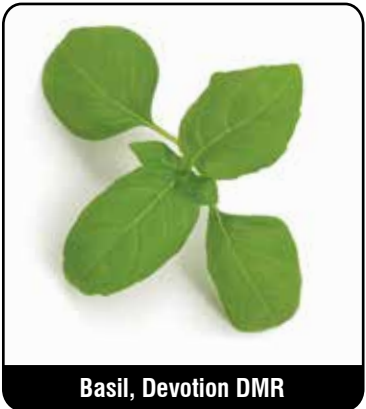

Basil, Genovese

Basil, Red Rubin

HERBS (OPEN POLLINATED)

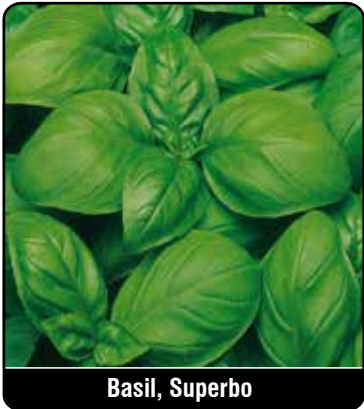

Item#	Variety ▼	Resistance/ Tolerance	Features
0500092	ARUGULA, ASTRO	Heat _(T)	An early, heat tolerant arugula with less deeply lobed leaves than regular arugula and a slightly milder flavor.
0500145	ARUGULA, SELVATICA	Heat _(T)	40 days. Slow growing wild type with deeply lobed leaves. Shelf life after harvest is very long. Sharp flavor.
0500113	BASIL, ELEONORA	Pb _(IR)	Slightly cupped to flat, 3" leaves with a somewhat spicier flavor than traditional pesto types. The leaf shape and more open habit make this variety less susceptible to basil downy mildew pressure.
0500039	BASIL, GENOVESE		Wide, medium-dark green leaf with less sensitivity to spot in heat and cold conditions.
0500004	BASIL, ITALIAN LARGE LEAF		Commercial variety with uniformly broad, medium dark-green leaves. Slow bolting.
0500034	BASIL, LEMON		80 days. Small pointed leaves with lemon flavor. 18" compact plant.
0500029	BASIL, RED RUBIN		Very uniform strain of dark, purple-red basil. Oval leaves have clove-like spiciness.
0500121	BASIL, DEVOTION DMR	Pb _(HR)	Genovese-type basil for potted plant production and fresh market; uniform, upright growth and dome or cup-shaped leaf.
0500122	BASIL, OBSESSION DMR	Pb _(IR) , Fob	Dark green 2.5" leaves with authentic flavor and appearance.
0500074	BASIL, SUPERBO	Fob	Medium sized, compact plant with broad, slightly corrugated spoon shaped leaves that are dark green, highly scented and carefully selected for blocking of any mint smell. Replaces Genovese.
0500089	BASIL, SWEET		Large leaf 18" plant. Leaves have a sweet mild taste and smell.

HERBS (OPEN POLLINATED)

Item#	Variety ▼	Resistance/ Tolerance	Features
0500079	BASIL, THAI		Annual. 15". Strong licorice taste. Small leaves, purple stems, strong clove scent.
0500024	CHIVES, GARLIC		Perennial. Flat bladed, chive-like herb with an assertive garlic flavor. Compact 12" plant.
0500077	CHIVES, NELLY		A fine to medium thick shafted variety with a very dark green color. Vigorous and upright growth. Improved tolerance to thrip spots on leaves. Strong disease resistance.
0500058	CORIANDER, ADVANCED TURBO II	Heat _(n)	An outstanding strain of coriander with high tolerance to Bacterial Blight. Heat tolerant and extremely slow to bolt. Glossy green leaves mature in about 35-40 days.
0500086	CORIANDER, CALYPSO		Consistently 10 days slower to bolt than Santo but with the same quick, early growth. The new standard Cilantro!
0500127	CORIANDER, CRUISER	Bolt _(n)	Vigorous uniform compact upright plant habit is widely adapted for Summer or Fall field crops. Good flavor and aroma. Great for bunching, large dark green leaves, slow to Bolt. Patented Variety. pvp
0500005	CORIANDER, LEISURE		Long standing variety with glossy, deep green, broad leaves. High yields. Slow to bolt.
0500042	CORIANDER, SANTO		A favorite strain of slow-bolting cilantro. High yields, attractive deep green leaves.
0500008	DILL, BOUQUET		Strong, tall, aromatic plants. Dark green.
0500125	DILL DIANA	Bolt _(n)	Annual. Very upright, dark green, leafy compact plants.
0500007	DILL, DUKAT		Heavy, dark green dill foliage and umbels. Variety used for warmer conditions.
0500103	DILL, SLOW		Compact plant with very fine leaves dark green in color. Highly aromatic. Slow to bolt.

SEED BORNE DISEASES

From our seed growers we are now demanding lab certificates, which report the status of each new seed lot on various seed borne diseases. The concentrated effort to supply clean seed to growers by all seedsmen now focuses the major cause for disease in the following areas. (a) contaminated seedling beds or top soils used in seedling flats, (b) the use of year old, unsterilized foam transplanting trays, (c) unsterilized and unfumigated greenhouses or tools, (d) neighboring disease carrier crops like rape or canola, perennial weeds, golden rod, wild turnip etc., (e) the failure to rotate crops, (f) overhead irrigation with diseased water, (g) improper control of carrier insects from diseased neighboring fields, (h) failure to clean cultivating equipment between crops.

We will supply certificates (copies) at \$5.00 each.

Redbor

Blue Ridge

KALE (HYBRID & OPEN POLLINATED)

Item#	Variety	Relative Days (DS) ▼	Type	Appearance	Features
0540001	WINTERBOR (Hybrid)	52	Fine Curl	Dark Green	Taller 24" stems allow easier stripping. Frost tolerance for spring fall or overwintering.
0540042	DARKIBOR (Hybrid)	55	Full Curl	Blue-Green	Used by growers who chop or bag their kale because ribs are less prominent. Resists yellows and bolting.
0540047	REDBOR (Hybrid)	55	Fine Curl	Dark Maroon	Tall 24-26" plant that turns from green with pink veins to a striking maroon color as it matures. Color enhanced when season turns cooler.
0540021	BLUE RIDGE (Hybrid)	60	Full Curl	Dark Blue-Green	Semi-tall plant type, mid-season maturity and a long yield. Slow bolting. Suitable for hand stripping, mechanical harvesting and processing. Widely adapted.
0540032	SCARLET CROP FAILURE	Mid-Late	Full Curl	2.5' Tall, Violet Green	Leaves are violet green, blistered and very curly. After the first frost, the leaves turn a more violet blue color. Highly frost resistant. Recommended spacing is 60x80cm. .
0540035	BLACK MAGIC	60-75	Strap Like, Savoyed	Black	Winter hardy with darker, savoyed leaves over conventional varieties. Flavor improves with frost. Mature leaves grow as a rosette rather than on a true stem. Can be used as baby leaf.
0540028	LACINATO	60-90	Strap Like	Blue-Green	Primitive open kale with strap like blue-green leaves 3" wide x 10" long. Ornamental as well as edible, flavor is enhanced by frost, extremely winter hardy.

FLOWERING KALE (HYBRID)

Item#	Variety ▼	Relative Days (DS)	Features
0540025	RED KAMOME	90	The edges of all the leaves are finely ruffled. Can withstand frosts and freezes. One of the few items that can be enjoyed in the winter garden. 6-10" plant.
0540040	WHITE KAMOME	90	The edges of all the leaves are finely ruffled. Can withstand frosts and freezes. One of the few items that can be enjoyed in the winter garden. 6-10" plant.

Increase Marketable Yields
with Seed Priming & Pelleting

Light is critical to the germination of lettuce seed.

Priming the seed breaks the photodormancy and thermal dormancy inherent in this species. Breaking the light sensitivity (photodormancy) and heat (thermal dormancy) enables the seed to germinate even though it is pelleted.

Pelleting is the application of a proportioned mix of powders around the seed to form a ball. Pelleting makes the seed more uniform in shape, weight and size, making it easier to handle. Seeds may be planted with precision at correct distances and depths (with less seed loss, thus a better stand with lesser seed use).

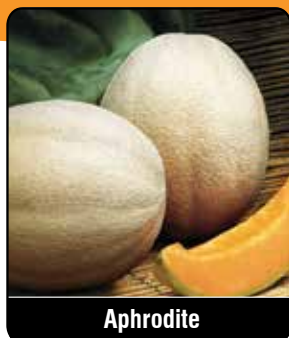

See price list for primed and pelleted varieties.

 Recommended for high tunnel and low tech greenhouse productions.

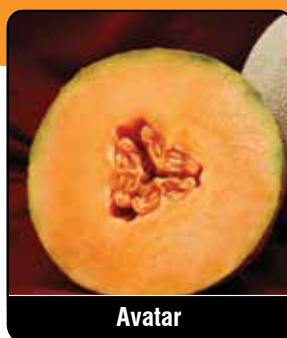

MTO - Tested for the presence of Lettuce Mosaic Virus and zero (0.0) were found in a sample of at least 30,000 seeds.

Melon Growing Tips

- Commercial melon fields need two bee colonies per acre placed in the field for proper pollination.
- Do not water the last week before fruit are ripe – overwatering can cause bland flavored fruit.
- Fruit are ripe when the skin color warms and the fruit slips easily from the vine.

Florida Broadleaf

Garnet Giant

Green Wave

Savanna

Southern Giant Curled

MUSTARD (HYBRID & OPEN POLLINATED)

Item#	Variety ▼	Relative Days (DS)	Size	Leaf	Features
0620003	FLORIDA BROADLEAF (India Mustard)	45	Large, Erect	Round with Serrated Margins, Medium Green	Widely adapted. Vigorous growing. Large, wide leaf for processing and fresh market.
0190043	GARNET GIANT (India Mustard)	40-50	Large	Savoy, Thick, Vivid Red	Superior red color over standard Red Giant types, even in Summer. Excellent for full size or baby leaf mix blends. Hot pepper taste, milder if cooked.
0620002	GREEN WAVE (India Mustard)	50	Large, Upright	Heavily Curled with Frilled Margins, Dark Green	Slower bolting than Southern Giant Curled. Better germination and harvest quality under warm temperatures.
0620005	SAVANNA (Hybrid) (Spinach Mustard)	35	Large, Upright	Smooth, Thick, Dark Green	Attractive hybrid that is early maturing and slow bolting. Multiple harvest, Spring and Fall.
0620001	SOUTHERN GIANT CURLED (India Mustard)	48	Large, Upright	Heavily Curled with Frilled Margins, Dark Green	Fast growing selection with resistance to bolting.

LONG DAY YELLOW ONIONS (HYBRID)

Item#	Variety	Relative Days (DS) ▼	Size	Skin Type	Color	Storage	Resistance/Tolerance	Features
0670071	HIGHLANDER	85-90	Large	Light	Brown-Yellow	Short to Medium	Ba _(IR) , Pd _(IR)	Extra early maturity type with excellent size and yield. Excellent skin, thin necks and high pack out. Best results under irrigation.
0670186 <small>NEW</small>	OUTLANDER	85-90	Medium	Globe	Yellow	Short	Foc _(IR)	Excellent appearance, very uniform bulbs with strong tops and roots. Best for fresh market and short storage.
0670152	BRANDT	90-95	Large	Globe	Golden Brown	Medium to Long		Surprising size and storability for an early onion. A superstar in our trials several years running.Exclusive.
0670120	TRAILBLAZER	95	Medium	Light-Medium	Bronze	Long	Ba _(HR)	Bulbs are tight and firm with good size and thin necks. It has strong resistance to botrytis and is slow to bolt. Excellent for storage, under optimum conditions Trailblazer can store until June.
0670097	MOUNTAINEER	99	Medium-Large	Medium	Yellow	Medium	Foc _(IR) , Pd _(IR)	Bulbs are very uniform with small necks and are very firm. Produces a nice size jumbo in dry or wet conditions.
0670183	SADDLEBACK	100	Large	Medium-Thick	Yellow	Medium		Strong root system permits growth on marginal muck soils, enabling high yield potential.
0670133	TREKKER	100	Medium	Medium	Golden	Long	Foc _(IR) , Ba _(IR)	Very uniform, extra firm bulbs, slow to bolt and stores well under optimum conditions. Holds up well during storage and ships well afterwards.
0670123	LASALLE	103	Large	Thick	Golden	Long	Foc _(IR)	Large bulb with small neck, excellent firmness and skin retention after 8 months of storage. High yields.
0670179	CATSKILL	105	Large	Thick	Golden	Long		Good skin retention and neck size. High yield and adaptability provides flexibility to plant on all soil types.
0670182	TRAVERSE	105	Medium-Large	Thick	Golden	Long	Foc _(IR) , Pt _(IR)	Strong top and upright plant habit. Uniform size and shape. Northern storage type.
0670064	MILESTONE	110	Large	Globe	Bronze	Medium		Early maturing, hard globed, long day spanish type with storability and attractive skin color. Has thin necks and single centers. Thinner necks cure down quickly.
0660003	FORTRESS	110	Medium-Large	Thick	Bronze	Long	Bolt _(T) , Foc _(IR) , Pt _(IR)	Excellent appearance, very uniform bulbs with high yield potential.

LONG DAY YELLOW ONIONS (HYBRID)

Item#	Variety	Relative Days (DS) ▼	Size	Skin Type	Color	Storage	Resistance/Tolerance	Features
0670180	RIDGELINE	107	Large	Medium Thick	Bronze	Medium	Foc _(IR) , Pt _(IR)	Long day yellow Spanish-type onion. Slow to bolt, has potential to produce jumbo sized bulbs with good roots.
0670178	POCONO	110	Medium	Medium Thick	Yellow	Long	Pt _(HR) , Foc _(HR)	Uniform, very small necks, very attractive bulbs. Widely adapted to areas that use Fortress and has shown excellent quality out of storage.
0670170	MONTCLAIR	112	Large	Thick	Golden	Long	Foc _(IR) , Pt _(IR)	Produces large, globe shaped bulbs with heavy, dark colored skin and has excellent quality out of storage. Best adapted for long growing season areas in New York, the Midwest and Southern Ontario, Canada.

SPANISH ONIONS (HYBRID)

Item#	Variety	Relative Days (DS) ▼	Size	Skin Type	Color	Storage	Resistance/Tolerance	Features
0670089	SIERRA BLANCA	100	Jumbo	Light	White	Short	Pt _(HR)	Snowy white exterior and interior make this a very attractive variety. Main season maturity, well suited for fresh market.
0660062	CANDY	105	Jumbo	Medium	Yellow	Short	Pt _(HR)	Bulbs have small necks and very sweet mild white flesh.
0670163	GREAT WESTERN	113	Jumbo	Medium	Bronze	Short	Foc _(IR) , Pt _(IR)	Adaptable, high yields, and strong plant growth. Good firmness and skin retention. Has high percentage of single centers. Can be direct seeded or transplanted.

SHALLOTS (OPEN POLLINATED)

Item#	Variety ▼	Relative Days (DS)	Size	Shape	Color	Features
0670139	ZEBRUNE	140-160	7.5-12"	Elongated	Dark Pink	Productive with dark pink, elongated bulbs with white flesh. The thin leaf is 7.5-12" high with a fine collar. Performs best on well drained soil in sunny locations. High in vitamins B & C with quercetin, a powerful antioxidant. Suitable for freezing.

CUSTOM COAT NOTICE:

Custom coated orders are subject to possible shrinkages or overages during the coating process. Therefore, any shrinkages will be invoiced for the initial dollar amount ordered at minimum, or any overages will be invoiced for additional seed that shipped. Thank you for your cooperation.

Onion Enhancements & Treatments

- Pellet:** The application of a proportioned mixture of powder type materials applied to the exterior of seed to change the physical characteristics (size/shape/weight). Pelleting facilitates easier handling of seeds, resulting in more accurate placement during planting and subsequently, improved plant stands.
- Encrustment:** Similar to a pellet, but a lesser amount of material is applied to the seed. Generally used just to fill in the cavities on an irregular seed such that it will move through a planter more efficiently.
- Filmcoat:** A Polymer put on the seed with the fungicide/insecticide, which binds the treatment evenly on the seed coat for increased visibility, seed health and dust free application. There is no size or weight increase to the seed.

- FarMore F1500** Chemical seed treatment with added contact and systemic insurance against fungi, insect damage, and insects that may transmit viruses or other disease organisms during the initial and crucial seedling period of your crop.
- EverGol Prime:** Fungicide placed on the onion seed to protect the developing plant from onion smut (*Urocystis colchici*) and *Rhizoctonia* spp. diseases. Active ingredient: Penflufen
- Pro-Gro:** Fungicide placed on the onion seed to protect the developing plant from onion smut. Active ingredients: Thiram and Carboxin.
- Trigard:** Insecticide added as a seed treatment for the control of onion maggots, which attack and destroy developing young onion plants. Active ingredient: Cyromazine.

BUNCHING ONIONS (OPEN POLLINATED)

Item#	Variety	Relative Days (DS) ▼	Size	Shape	Color	Resistance/Tolerance	Features
0670199	WHITE GEM HYBRID	62		Elongated	White	N/A	Shiny, dark green upright foliage contrasts well with medium length shanks. Plants have excellent field standing ability. Use for summer-fall harvests.
0670141	NATSUGURO	66	12-16"	Elongated	White	Heat _(T)	Excellent for summer/high heat harvest. Single stalk, strong tops, and a plant type that will not lodge. Exceptional variety and a must for commercial growers!
0660039	TOKYO LONG WHITE	68	25-28"	Elongated	White	N/A	Non-bulbing onion. White stalks with dark green leaves and mild flavor. Excellent producer, not for over wintering.
0670058	EVERGREEN WHITE NEBUKA	70-110	12-16"	Elongated	White	N/A	Very hardy for overwintering. Sow in spring for summer use or in fall for overwintering. Little or no bulbing.

PARSLEY (OPEN POLLINATED)

Item#	Variety	 Relative Days (DS) ▼	Leaf	Color	Resistance/ Tolerance	Features
0680004	DARK GREEN ITALIAN (Stokes Selection)	 65-70	Plain, Flat, Moderately Cut	Glossy, Dark Green		Fancy, wide leaf type with broad, smooth, glossy leaves. Makes for attractive bunches.
0680017	PLAIN 2	65-70	Flat, Finely Divided	Medium Dark Green		Medium growing plant with medium thin stalk. Finely divided leaves, very aromatic. Can be overwintered in Mid-Atlantic region.
0680001	FOREST GREEN (Stokes Selection)	 70-75	Curled, Deeply Cut	Dark Green	Heat _(T)	Plants are erect and vigorous with good holding ability in hot weather. Good regrowth after multiple harvests.
0680016	GIGANTE D'ITALIA	80	Plain	Dark Green		Extra-large aromatic flat leaves with strong stems.
0680025	HAMBURG HALF LONG	85	Berliner Type			Heavy shoulders, half long wedge shaped roots that resemble Chantenay carrots. Roots average 6".
0680005	HAMBURG LONG ROOTED	90	Tapered, Long Roots	White Roots		Resembles slender parsnips. Definite parsley flavor. 8 - 10 inch roots.

PARSNIP (HYBRID & OPEN POLLINATED)

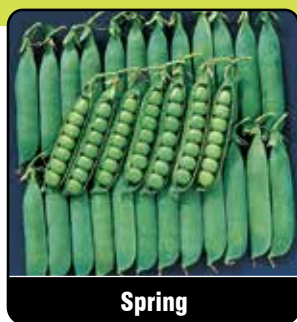

Item#	Variety	 Relative Days (DS) ▼	Features
0700004	JAVELIN	110	Consistent, reliable, flexible and very well proven. Slender wedge shaped root-ideal for pre-pack market. Shallow crowns make for easy cleaning. Can be sown throughout the sowing year and its tremendous field holding capacity and excellent canker resistance means it can be cropped almost continually from July to June.
0700010	ALBION (Hybrid)	120	Very white firm roots, high yield potential. Medium depth crowns taper more gradually to heavier tips. Some resistance to Brown Canker.
0700008	GLADIATOR (Hybrid)	120	Large refined hollow crown shape, smooth white skin, vigorous tops, rounded shoulders. Resistance to Brown Canker. Excellent taste, very sweet, stores 4-5 months.

SHELLING PEAS

Item#	Variety	Relative Days (DS) ▼	Vine	Pea	Peas/Pod	Length	Resistance/ Tolerance	Features
0720038	SPRING	52	22"	Dark Green	6-7	3"	F _{1(HR)}	A dark podded early, developed by Asgrow. Pods average 3", vines 22", 6 - 7 medium sieve size peas per pod. Peas are dark green, recommended for freezing or fresh market.
0720083	JUMPSTART	56	22"	Medium Dark		3.6"	F _{1(HR)}	Performs well in cold soils. Excellent early vigor, double podded, providing a high early yield potential. Medium size blunt medium green pods have high quality peas with a uniform color at harvest. Plants are 22" in height and easy to cultivate. Fresh market type. PVP
0720079	LEGACY	59	24"	Dark Green		3.5-4"	F _{1(HR)} , Ep, PEMV	An early Bolero type. Heavy yields of double and triple pods, with an average sieve size of 4.00 on compact dark green plants. Recommended as a replacement for Bolero. For processors or fresh market.
0720004	KNIGHT	61	24"	Bright Green, Wrinkled	7-8	3.5"-4"	Ep _(IR) , Fop _(IR) , PEMV _(IR)	Bright green pods are narrow and pointed with high yields on compact plants. pvp
0720085	SIENNA	63	25"	Dark Green			F _{1,2(IR)} , Ep	Excellent multiple podded variety with medium sized blunt pods. Well adapted to early spring weather and handle cool soils very well. Multiple pods provide a high yield potential. Dark green quality peas have a sieve size of 4.2 and uniform color at harvest.PVP
0720063	SABRE	65	24"	Dark Green	10	3.5"	F _{1(HR)} , RR, Ep	Double podded types with dark green peas for early main season processing or fresh market. Average 3.90 sieve size (45% size 4) berries and 3.5" pods. Tolerant to Fusarium Wilt and Root Rot plus Powdery Mildew.
0720046	BOLERO	66	28"	Bright Green	7-9	3"	Fop, Ep, PEMV, YM, RR, F, W, WP	High yielding, high sugar, freezing, medium size 3 in/8 cm double podded (7-9 peas) type.
0720082	JUMBO	71	32"	Dark Green	8-10	5"	F _{1(HR)}	Large podded fall harvest type. Pods are about 5 in/12 cm long and are filled with 8-10 large dark green peas per pod with sieve 6.0 size. Vigorous 32 in/81 cm plants can be grown commercially in rows. Use for fresh market or processing.
0720040	UTRILLO	71	30"	Dark Green	8-10	5"	Fop _{1(IR)}	Attractive, large pods are nicely shaped.
0720078	PLS 595 (VINE) AFILA TYPE	72	28-32"	Bright Green	11	3.6"	Ep, F _{1(HR)}	Afila type plant (Semi leafless plant) produces two long pods per node with on average 11 berries in each pod, with a sieve size of 3.6 on a 28-32" plant. Upright plant type and pods set high in the plant enable easy hand picking.

SOUTHERN PEAS

Item#	Variety ▼	Relative Days (DS)	Features
0720022	MISSISSIPPI PURPLE	68-73	Pods shell easily. High yielding, disease tolerant, purplehull brown crowder.
0720009	MISSISSIPPI SILVER	60-65	Large seeded brown crowder with pale silvery pods at green shell stage. 6-6.5" pods.
0720008	PINKEYE PURPLEHULL	65-70	Semi erect vine with a lavender flower. Pods are above the foliage, about 18cm long, and are purplish-green at green shell maturity turning purple when dry. The seed is green at fresh market maturity turning to creamy white at the dry stage and has a maroon eye.
0720045	QUEEN ANNE	68	Fresh market blackeye pea variety. Compact vines, machine harvest. Bright seed color.
0720069	SA DANDY	70-75	Bush type plants produce good yields of cream cowpeas. Thrives in hotter, Southern weather.
0720062	TEXAS CREAM 8	70-80	High yielding bush type. Pods concentrated high on plants.
0720066	TEXAS CREAM 40	65-80	Tall, upright, bush plants are drought tolerant and produce pods with cream colored peas and an orange eye.
0720049	TOP PICK BROWN CROWDER	68-73	Replaces Mississippi Purple. Top Pick Brown Crowder has a brighter red/pink pod compared to the dark purple pod of Mississippi Purple. Seed size and color are similar in both varieties.
0720065	TOP PICK CREAM	50	Upright bush-type plants with pods concentrated at the top of the plant. Early maturing, high yielding, and easy to shell. Good vines and disease resistance.
0720048	TOP PICK PINKEYE	50	Upright bush type with pod placement clustered at top for easy picking. Pale purple color on pods when ready to pick. High yield potential. Good virus and disease tolerance.
0720073	WHITE ACRE	Late	Semi erect plant with white flowers. Pods are 6-7" long with 16 seeds per pod. Pod color at maturity is green turning light purple. At dry stage they are dark straw colored. Seed shape is ovate with a wrinkled seed coat. Seed color is cream and size is very small.
0720059	ZIPPER CREAM	66	Large creamy white seeds in a green pod. Plants are low and bushy. Easy shelling pea with high yields and delicious flavor.

TOMORROW'S HARVEST IN TODAY'S SEED

 US Agriseeds®

Cultivating Global Health™

Super Max

- Outstanding Monoecious Pickling Cucumber with high yield potential and resistance to PRSV, WMV, ZYMV & CMV. High quality fruit are uniform in shape with small seed cavity, dark green color and crisp texture.
- This variety has a very vigorous plant which matures 40 to 45 days to first pick. It is ideal for fresh market and also well suited where pickles are sold for processing.

Jedi

- Vigorous, continuous set type plant producing large, classy, smooth, glossy dark green fruit with thick walls.
- Size averages 4.0-4.5 inches
- This variety is noted for its excellent yield, high quality fruit and BLS 1-3 resistance.

SH2 bi-color

Myrtle

Good quality with
extra-large fruit size

Performance may vary, from location to location and from year to year, as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible and should consider the impacts of these conditions on the grower's fields.

HR = High Resistance. IR = Intermediate Resistance. To find out more about disease resistance and the applicable levels of disease resistance, visit www.worldseed.org, and view the "Definition of the Terms Describing the Reaction of Plants to Pests for the Vegetable Industry" paper in the Vegetable Resources section.

Key to Disease Resistance*
Xcv = Bacterial leaf spot
Pc = Phytophthora blight
Tm = Tobamovirus

Better with every generation.

At Seminis®, we are constantly thinking of the next generation. Not just the next generation of seeds with outstanding growing potential, but the next generation of our customers and their families all over the world.

That's why we are constantly innovating and developing a bean that provides growers with high yield potential, color, shape, plant type, and disease resistance. New research tools like molecular markers and multiple breeding facilities allow Seminis to develop and test more products than ever before.

The sweet taste of strong field performance.

For 150 years, the Seminis® heritage has been building a portfolio of unique, great-tasting varieties from around the globe. We are constantly thinking of the next generation of seed, our customers and their families. So while our seeds are bred to produce onions with the shape, pungency and shelf life consumers desire, it all starts with you—our growers. Of course, the end consumer will tell you our products taste great, too—for the past 150 years and onto the next.

Introducing

SYNERGISTIC *Plus*

*The next generation of
synergistic sweet corn.*

Increased supersweet kernels
for added sugar

Enhanced tenderness

Extended holding ability

Lengthened harvest window

Can be grown with all
synergistic types

Evolution

A 72 day synergistic plus bi-color with a large 8 x 2", 16 row ears, attractive outside package, good cold soil emergence and the outstanding eating quality you'll come to love with the new synergistic plus.

Progression

A 78 day synergistic plus bi-color. Ears are 8-8.5 x 2", with strong tip fill and amazing 18-20 row counts. Combine that with synergistic plus quality and texture, you're sure to have a winner for your late season void.

Bred to be Strong Start to Finish

Hybrid Onions

Excellent yield potential and slow to bolt

Firm bulbs are good for fresh and short term storage markets

Extra early, approximately 85 - 90 days

Thin neck cures down quickly

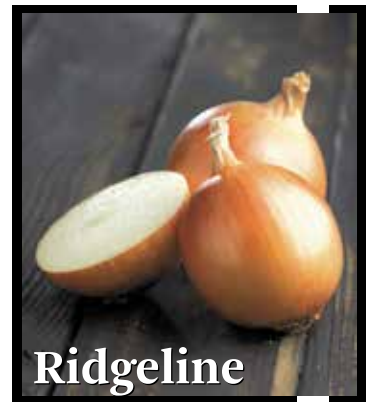

Excellent uniformity

Best for fresh market and short storage

Extra early, approximately 85 days

Strong tops and roots, intermediate resistance to Fusarium

Excellent size and yield potential

Hard bulbs with great skin quality are ideal for long term storage

Mid-maturing, approximately 107 days

Good roots and tops

Uniform in size and shape

Firm bulbs with attractive skin are suitable for fresh and long term storage markets

Potential to produce Jumbo bulbs

High resistance to Fusarium and Pink root

Hybrid Squash

Single vine, bush type

Between 1.8 to 2.0 kg (4.0 - 4.5 lbs)

Sweet nutty flavor

45 to 50 days maturity after flowering

All-America Selections winner

Hybrid Cabbage

Medium-size frame, attractive round heads

Fresh market, ideal for boxing

Matures approximately 75 days from transplant

High tolerance to Fusarium yellows

Excellent heat tolerance

TAKII SEED

Creating Tomorrow Today

Leading The Way

Pursuit

Pursuit is a bi-color, TripleSweet variety with improved insect resistance from the Attribute® II trait stacks. Pursuit also offers beneficial herbicide tolerance and gives growers another option for harvesting outstanding yields of high-quality sweet corn that meets market demand.

Quick Trip **NEW**

An exciting early-season TripleSweet bi-color variety, Quick Trip boasts the great eating quality that TripleSweet varieties are known for in the portfolio. Syngenta's first early-season variety with the Attribute® II trait stacks, Quick Trip is ideal for fresh local sweet corn growers in the northern U.S. and Canada.

Patriarch

Patriarch offers superior eating quality with excellent adaptability across many growing regions. Built on a large augmented sh2 chassis and combined with Attribute® Plus trait stacks, this variety is a game changer. For less hassle from seed to tassel, Patriarch is your go-to variety.

Early Abundance

Our tiny but mighty hybrid pumpkin, Early Abundance, yields 4-6 lbs. dark orange fruit. This uniform-size variety has intermediate resistance to powdery mildew and has proportional handles. It matures early, in approximately 90 days.

For more information on these or other Syngenta Varieties, visit **[SyngentaUS.com/Vegetables](https://www.syngenta.com/Vegetables)**

syngenta®

®

SHELBY Determinate Saladette

Shelby is a classic elongated shaped variety with high yield potential and good vine-ripe flavor. Fruit are an attractive red color, very firm, have low gel and a good shelf-life. It can be used for both mature green and vine ripe markets. The plants are medium to medium tall, have strong cover and benefit from pruning. Shelby has potential to be used in multiple slots and regions across the eastern US and has a strong disease package.

- Good hot setting
- High yield potential
- Strong disease package

STM2255 Determinate Salad

STM2255 is a very versatile and adaptable determinate salad variety with high yield potential and good vine-ripe flavor. Fruit are an attractive red color, firm and have a good shelf-life. It can be used for both mature green and vine ripe markets. The plants are medium tall, have mid cover and benefit from pruning. STM2255 has potential to be used in multiple slots and regions across the eastern USA.

- Very good flavor
- Very good fruit size and yield potential
- Widely adapted across multiple regions and seasonal slots

ROADSTER Determinate Salad

Roadster is a high quality determinate salad variety featuring a combination of early maturity and extra-large size. Fruit are an attractive red, very firm and smooth-shouldered with a superior flavor. Suited for both mature green and vine ripe markets. The plants are medium tall and benefit from light pruning. Roadster has a concentrated set and very high yield potential. Roadster is quickly gaining a reputation for exceptional taste and rich red color.

- Widely adapted
- High yield potential
- Extra-large fruit size with great flavor

RED SNAPPER Determinate Salad

Red Snapper is a versatile and adaptable determinate salad variety with very good hot potential. Fruit are an attractive red color, firm and have a good shelf-life. It is suited for both mature green and vine ripe markets. The plants are medium tall, have mid cover and benefit from pruning. Red Snapper has a more manageable plant than most hot set commercial varieties with good fruit set potential.

- Good hot set potential
- Very good fruit size and yield potential
- Widely adapted across multiple regions and seasonal slots

TWISTER Cauliflower

Twister is a tight, heavy-headed, white cauliflower with good internal wrap. It is mid-maturing with very uniform harvest and has shown minimal defects when grown in slot (late June – late October harvest in Salinas and Santa Maria/Oxnard). Twister performs well in the desert and good results have come recently from the Northeast.

- Very uniform harvest
- Tight and heavy headed
- Good adaptability

EMERALD CROWN Broccoli

Emerald Crown is a medium-maturing, very uniform, heavy-headed, domed variety with small beads on a small framed plant. Emerald Crown growing season is warm to cool (not for rainy season). Emerald Crown can extend the Green Magic slot into cold due to its resistance to purpling. Emerald Crown produces excellent quality crown cuts/short trim in all NAFTA regions.

- Produces excellent quality crown cuts/short trim in all NAFTA regions
- Highly resistant to purpling

XTREME VANTAGE Cabbage

Xtreme Vantage is a new cabbage variety from Sakata showing very good uniformity in the field. In addition, it has a good disease package showing strong resistance against Black rot and a strong tolerance to Tip burn.

- Tough against Black rot
- Strong tolerance to Tip burn
- Very good uniformity

SUPERSTAR Cabbage

SuperStar is a very high quality fresh market mid-season green cabbage. It has excellent wrappers for a fancy pack along with excellent holding ability in the field and after harvest. This great tasting cabbage is Fusarium yellows race 1 resistant and black rot tolerant.

- Excellent holding ability
- Thick leaves

MERCER Pepper, Bell

Mercer is a widely adapted green-to-red bell pepper well suited for the North Eastern U.S. growing regions. The maturity is mid-early, with high yields of extra-large fruit with good quality. Plants are vigorous, sturdy, have good cover and have high yield potential. The fruit are firm, dark green and mature to a very attractive deep red color. Mercer has high resistance to TMV: 0 / Xcv: 0-3, 7, 8 and intermediate resistance to Pc.

- Widely adapted
- High yield potential
- Quality fruit
- Good IR: Pc for the Northeast

NITRO S10® Pepper, Bell

Nitro S10® is a high quality, mid maturing hybrid suited for place pack. It is adapted to fall and spring in the southeast and summer production in the northeast and suited for production where bacterial leaf spot is a concern. The fruit have good size uniformity and are smooth, firm, glossy dark green and mature to red color. Nitro S10 benefits from a nutritional management program that helps build a productive plant. It has high resistance to TMV: 0 and intermediate resistance to Pc (Phytophthora), TSWV and Xcv: 0-10.

- Place pack with high quality
- Quality fruit with good firmness and uniformity
- Strong disease package

Getting the best out of nature

Positioned right at the start of the food chain, we apply state-of-the-art techniques to the rich genetic diversity nature offers us. Together with our partners, we can make our vegetables tastier, more appealing, easier to prepare and even more healthy.

Topma RZ

Cabbage

- Round blue-green hybrid cabbage with uniform head size and great wrapper leaves
- Great for fresh marketing and processing
- Compact filling, short core, strong frame and FOC tolerant
- 75-80 days to maturity, 3-7 lbs with great field holding capabilities

Marabu RZ

Spinach

- Widely adapted main season variety
- Smooth, glossy and uniform leaves
- Good for convenience and processing markets
- Good resistance to CMV
- Suitable for spring, summer and autumn cultivation

Betty RZ

Beet

- Red beet variety for fresh market
- Nice round shape with smooth skin and a small crown
- High yielding variety
- Excellent uniformity
- Very healthy leaves

Vegetables People Love

We make healthy eating enjoyable and sustainable.

CARROT

BULLDOG F1: Strong top, large crown attachment, uniform shape and size with a semi blunted root tip. Bulldog is a main season bulky root for jumbo/process market with 20-24cm L, 3-5 cm D root dimensions.

MAVERICK F1: Excellent strong tops with good resistance to foliar disease such as Alternaria. Maverick is an early cello with 23-25 cm L, 3-5 cm D root dimensions.

WATERMELON

6177 F1: 6177 is a round to slight oval fruit shape in the Super Seedless class and possesses intermediate resistance to Fusarium 1.

7187 F1: 7187 is an oval shape Crimson Sweet Seedless watermelon, light green with wide dark green stripes. 7187 possesses intermediate resistance to Co (*Colletotrichum orbiculare*).

LEEK

KRYPTON F1: Early maturing, upright plant type with a medium shaft. Strong, durable variety that handles well during the long harvest window.

HOT BANANA / HUNGARIAN PEPPERS (HYBRID & OPEN POLLINATED)

*Note: this variety may display some genetic variability.

Item#	Variety	Relative Days (TP) ▼	Fruit	Fruit Size (L x Diam.)	Scoville Rating	Resistance/Tolerance	Features
0750618	FURY (X3R) (Hybrid)	Early		Large	600	Xcv: ⁰ -3,7,8(HR)	Early maturing Hungarian yellow wax pepper with large attractive fruit, good uniformity and quality. Vigorous plant with a strong canopy and high yield potential.
0750098	GOLDEN DAGGER (Hybrid)	55		8" x 2"	3,000 to 3,500		Larger, earlier, very hot. Less green streaks than other varieties at maturity.* Exclusive.
0750092	HUNGARIAN SEMI-HOT (Hybrid)	60		5.5" x 3.5"	1,800 to 2,400		Heavy crops of extra-large, medium-hot Hungarian stuffing peppers. Slight green tinge.*
0750630	HOT PORTUGAL (O/P)	64		6"	5000		O/P. Fiery hot, 6" long, tapered, glossy scarlet fruit.
0740084	INFERNO (Hybrid)	65		8"	900		A productive hot banana hybrid. Smooth fruit has sloping shoulders, is medium green with slim tapered shape. Ripens yellow/red.
0750476	BLAZING BANANA (Hybrid)	70		9" x 1.75-2"	3,000 to 6,000	Xcv: ¹⁻³ (IR)	Early maturing, strong plant with excellent fruit coverage and high yields. One of the few hot banana varieties with BLS 1-3. Ideal for fresh market and processing.

CAYENNE PEPPERS (HYBRID)

Item#	Variety	Relative Days (TP) ▼	Fruit	Fruit Size (L x Diam.)	Scoville Rating	Resistance/Tolerance	Features
0750644	WILDCAT	Early		Large	800		Early maturing cayenne pepper with large, fruit. Improved plant with better cover and a high yield potential due to fruit size and set.
0750634	EL SENOR	70		10 x 1.5"			Pungent with a great aromatic flavor and taste. Fruit have a unique, twisted crinkled top and long cylindrical shape. Turns from medium green to bright red.
0740061	MESILLA	70		10 x 1.5"	1000	PYV: ⁰ (HR), Tm: ⁰ (HR)	Very long wrinkled, slim, light green cayenne that matures red.
0750379	IBERIA	82-88		10-12" x 1.75"	1,100	TMV _(IR)	An improved long, hot cayenne that is similar in appearance to Mesilla but longer and slightly hotter in taste. Plant is designed for multiple productive harvests.
0750289	GOLDEN HEAT	87		6" x 0.5"	3,000 to 6,000		This hybrid "finger hot" is a yielder of consistently sized very hot cayenne peppers that despite its name mature from green to red. Excellent for drying.

0750286	DON MATIAS	Early		6 x 4"	2,000 to 4,000	TMV _(HR) , Pc _(IR)	Dark green, tapered two lobed Mexican type. Vigorous plant and root allows this hybrid to adapt too many regions. Produces high quality large fruit with high yield potential.
0750449	ANCHO ALLENDE	Midseason		6" x 3"	1,000 to 3,000		Excellent shape and uniformity. Concentrated set with dark green fruit. Sets fruit well under hot growing conditions.
0750581	HIDALGO	Midseason		6.5" x 3.25"	800		Nice large size, bred for harvest periods in high temperatures. High percentage of two vein fruits, maturity for mulato market.
0740102	HITMAN	Medium-Early		7.5" x 3.25"	1,500 to 3,500	Tm _{0(HR)}	Attractive dark green, glossy color. Well covered plant provides protection from the sun. Produces high yields of uniformly large, dark green fruit.

SERRANO PEPPERS (HYBRID)

Item#	Variety	Relative Days (TP) ▼	Fruit	Fruit Size (L x Diam.)	Scoville Rating	Resistance/Tolerance	Features
0750517	ALTIPLANO	Mainseason		5"	Unrated		Widely adaptable with a vigorous plant. Uniform, glossy green fruit with excellent quality. High-yield potential.
0750479	DEVIL	72-75		3-4"	3,500 to 6,000	PVY, TEV	High pungency, preferred size, dark green uniform fruit, and vigorous plant makes this variety a superior choice. Excellent field storage.

SPECIALTY PEPPERS (HYBRID)

Item#	Variety	Relative Days (TP) ▼	Fruit	Fruit Size (L x Diam.)	Scoville Rating	Features
0750620	CRACKLE (Finger Hots)	60-70		4-5"	1500-3000	This Finger hot type is dark glossy green, uniform and has conical-pointed fruit. Sturdy mid compact plant. Excellent yield potential.

SPECIALTY PEPPERS (HYBRID & OPEN POLLINATED)

Item#	Variety	Relative Days (TP) ▼	Fruit	Fruit Size (L x Diam.)	Scoville Rating	Features
0750477	RIO TESORO (Hybrid)	70		3.5" x 2"	3,000 to 5,000	Produces attractive, high quality yellow fruit with a broad shoulder, thick walls, and tapered blunt end. A strong, prolific plant with an outstanding fruit set.
0750626	FEROZ (Hybrid)	70-75		Large		This large Serrano type pepper has shiny dark green fruit, exceptional hot flavor and grows on a vigorous plant in concentrated sets. High yield potential.
0750423	SANTA FE GRANDE	75		3.5" x 1.5"	5,000 to 12,000	Hot conical blunt, medium-walled yellow to orange-red pepper. Upright, 24-28" plants with continuous, heavy yields. Suitable for home or market gardens.
0750414	TABASCO	80		1.5"	30,000 to 50,000	Exceptionally hot! Fruits ripen from yellow-green to red, and are easily harvested. Vigorous plant grow up to 4 feet tall with high yields.
0750596	MAD HATTER (Hybrid)	85-90		2-3.5" x 2-2.5"	100 to 500	Crunchy and crisp with delicate floral scent and rich flavor that intensifies and sweetens as it matures. In hot, dry climates, a small number of fruit will have a touch of heat close to the seed cavity but fruit wings are always sweet.
0750453	GHOST (Red Bhut Jolokia)	90-100		2" x 1"	1,000,000+	Wrinkled fruit that mature from green to red. New strain with improved vigor and earliness. Use caution in handling and consumption as they are one of the hottest peppers known to man.

Conestoga Special

Large Marge

EXTRA LARGE PUMPKINS (HYBRID & OPEN POLLINATED)

Item#	Variety	Relative Days (DS) ▼	Size	Shape	Texture	Plant Type	Resistance/ Tolerance	Features
0780214	HULK (Hybrid)	100	15"H x 13"W, 35+ lbs.	Barrel	Medium Ribbing	Vine		Large barrel shaped pumpkin with very dark orange color and a large 5", dark embedded handle. Has the ability to set several large and uniform fruit per plant.
0780124	CONESTOGA SPECIAL	110	40+ lbs.	Round	Medium Ribbing	Vine		This extra large, open-pollinated pumpkin has excellent color, and a very nice thick handle. Conestoga Special has greater yield potential than Phat Jack and is larger than Conestoga Giant Hybrid. Exclusive.
0780245	LARGE MARGE (Hybrid)	105	13"H x 13"W, 30-40 lbs.	Round to Blocky	Ribbed and Wrinkled	Full Vine		An extremely large pumpkin with a dark and large embedded handle to match the fruit size. Great dark orange color.
0780006	PRIZEWINNER	120	100 lbs.	Round	Shallow Ribbing	Vigorous Vine		F1 hybrid, reddish orange fruit mature up to 100 lbs. with a deep round shape, shallow ribs and small blossom scar and handle.
0780121	WORLD OF COLOR (Hybrid)	120	50-125 lbs.	Mostly Round	Various	Vigorous Vine		A blend of 50-125 pound monsters that vary in color--orange, white, pink, blue and peach. Beautiful variety of autumn colors!
0780081	PHAT JACK	125	50+ lbs.	Tall/ Round	Medium Ribbing	Vine		True Jack-O-Lantern shape and color, but can grow to 50+ pounds! Extraordinarily thick handles top off the only pumpkin we could truly call "Phat" — Pretty Huge and Terrific! Exclusive.

WHITE PUMPKINS (HYBRID & OPEN POLLINATED)

Item#	Variety	Relative Days (DS) ▼	Size	Shape	Texture	Plant Type	Resistance/ Tolerance	Features
0780204	CASPERITA	77	1 lb.	Flattened	Deep Ribbing	Semi Bush	Px _{2(IR)} , WMV _(IR)	Outstanding miniature ornamental pumpkin also features edible flesh with texture and sugars similar to an Acorn squash. Semi-bush plant habit produces high yields.
0780164	SNOWBALL	90	1-2 lbs.	Round	Smooth	Vine	Px _(IR)	Very high yielding with attractive smooth round fruit. Bright white color with a dark green stem. Has the ability to hold its white color under stress.
0780101	GOOLIGAN	95	2"H x 3"W, 4 oz.	Flat, Concave Top	Deep Ribbing	Vine		Sweet little hybrid pumpkins are pure white and deeply ribbed with the graceful shape of a miniature fairytale coach. Plants set high numbers of these pretty pumpkins that are slightly larger than Baby Boo. Edible.
0780265	SPECTER	95	20 lbs.	Round	Warty	Vine	Px _(IR)	Early maturing, medium round 9-12" lightly warted white pumpkin with large, firmly attached handles. Uniform shape and size and semi-hard shell that keeps color longer. High yield potential.
0780243	STELLA LUNA (Hybrid)	95	12-15 lbs.	Round	Slight Ribbing	Trailing Vine	Px _(IR)	Heavy yield of uniform fruit with attractive, bright white color.
0780203	BLANCO	105	4-6 lbs.	Round	Medium Ribbing	Medium Vine	Px _(IR)	High quality bright white pumpkin with a great shape and long handle. Blanco holds its white color well in the field.
0780169	CRYSTAL STAR	100	11"H x 12"W, 25-35 lbs.	Round	Smooth	Medium Vine		Maintains its true white color through maturity. Perfect for painting Jack-O-Lantern and decorating.
0780211	LUMINA	100	10-15 lbs.	Globe, Flat-Globe	Smooth	Vine		Shape and size vary from globe to flat globe and 8-10". Flesh is bright orange. Harvest slightly immature (late Aug.) for better white as stress will cause a blue tinge.
0780139	NEW MOON (Hybrid)	100	35-45 lbs.	Round	Slight Ribbing	Vigorous Vine		New large sized hybrid, which is uniform in size. Strong vines and white colored rind and flesh.

SPECIALTY PUMPKINS / FALL ORNAMENTALS

(HYBRID & OPEN POLLINATED)

Item#	Variety	Relative Days (DS) ▼	Size	Shape, Color	Texture	Plant Type	Resistance/ Tolerance	Features
0780267	WARTY GOBLIN	90	8-20 lbs.	Oval Round	Warty	Vine	Px _(IR)	Warted hard-shell type (hard to cut) but stores longer than regular varieties. Oval/round in shape, it has dark orange skin with lots of green warts, keeps color for several weeks after harvest, then turning yellow. Dark green handle, firmly attached.
0780085	JARRADALE	90-100	10-12"W, 7-8 lbs.	Oblate, Concave Top, Blue	Heavy Ribbing	Vine		This unique blue skinned pumpkin has a beautiful salmon-orange interior. The flesh quality is firm and has an excellent flavor. This beautiful autumn harvest display is rapidly becoming a standard in fall programs.
0890122	KAMO KAMO	95	7"D	Round-Oval, Orange, Green	Broad Ribbing	Vine		A unique ornamental squash that is edible! Remarkably decorative, primary color is yellow orange with green streaky spots between the ribs.
0890243	MORANGA	95	4-8 lbs.	Flattened, Light Pink to Salmon	Deep Ribbing	Vine		Brazilian squash is named for traditional dish 'Camarão na moranga' which means 'shrimp in a squash'. Prolific plants.
0890123	GALEUSE D'EYSINES (Peanut)	95-100	15-20 lbs.	Oblate-Flattened, Pink	Peanut Bumps	Vine		This spectacular squash is pink with beige bumps, which resemble peanuts, covering its surface making this pumpkin-like squash truly unique!
0780200	SILVER MOON (Hybrid)	95-100	5-6 lbs.	Flattened, White	Medium Ribbing	Vine	Px _(IR) , ZYMV _(IR)	Hybrid Australian pumpkin with dark orange colored flesh. Uniform in size and shape. Very pale blue with silvery white striping and speckling.
0780272	HSC151	96	9-14 lbs.			Vine		F1 hybrid. Early, large uniform yellow and green striped high yielding "naked seeded" type with excellent tasting seeds. Avoid irrigation just before harvest. Transplanting is recommended.
0890152	AUTUMN CROWN (Hybrid)	100	4"H x 9"W, 2-4 lbs.	Flattened, Tan	Medium Ribbing	Medium Vine		Miniature Long Island Cheese type with excellent eating quality. Extremely uniform fruit with bright orange internal color.
0890236	AUTUMN FROST (Hybrid)	100	6"H x 5.5"W, 3.25-4 lbs.	Upright, Boxy, Tan with Waxy Patina	Moderate Ribbing	Vine	Px _(IR)	Unique attractive fruit are great for decoration and are very flavorful. Good storability.
0780211	BLAZE (Hybrid)	100	3.5"H x 7"W, 3 lbs.	Flat, Round, Yellow, Deep Orange	Slight Ribbing, Smooth	Reduced Vine	Px _(HR)	Ornamental pumpkin featuring yellow and deep orange stripes with a dark green, strong handle. Plants are very vigorous and offer top yields.

Red Jewel

RADISH (HYBRID & OPEN POLLINATED)

Item#	Variety	Relative Days (DS) ▼	Root Shape	Root Color	Height	Features
0800105	BODIAM RZ (Hybrid)	Early	Round	Bright Red		F1 hybrid. Uniform bulbs with contrasting bright white interiors. Strong leaf attachment for ease of handling and mechanical harvest. Good tolerance to cracking. For bunching and processing.
0800094	CRUNCHY KING (Hybrid) Performax®	Mid-Early	Globe	Scarlet Red	Medium	Excellent shape, uniformity, and white internal quality with attractive dark red skin. Very high recovery and slow to pith. Ideal for multi-purpose bunch or cello.
0800016	CHERRIETTE (Hybrid)	20	Globe	Bright Red	Short	F1 hybrid. Bright cherry red, globe shaped roots are crisp, hold well, with nice uniformity and extra size. Grows well in warm regions. Recommended for shorter day length harvests (spring or fall). Cello or bunching.
0800106	RED JEWEL (Hybrid)	22	Round	Red	Short	Medium sized round radish with excellent snow white interiors and thick skin. Use for bunching, cellos and slicing. IR; Hb, For.
0800103	RED SATIN	23	Globe	Glossy Red	Medium	Medium tops, superior red colored round roots with thick cuticle. Nice white interiors. IR;Ar, Rs.
0800036	FIREBALL (Hybrid) Performax®	24	Globe	Scarlet Red	Medium	Hybrid production of uniform, intense red roots. Tops slightly taller than Cherriette. High pack-out potential.
0800045	CRUNCHY ROYALE (Hybrid) Performax®	25	Globe	Bright Red	Medium Tall	Excellent uniformity and quality in all production areas, spring or fall harvest. High pack-out rate. Excellent tops for bunching or machine-pulled cellos.
0800098	STARGAZER (Specialty)	55-60	Globe	Rosy Interior, Green/White Exterior	Medium Tall	Unique watermelon type radish. Recommended for summer plantings and fall harvest. Mild radish flavor with crisp, juicy texture. Can be used as a delicious addition to salads, for slaw, or for pickling.

SPECIALTY WINTER SQUASH (HYBRID & OPEN POLLINATED)

Item#	Variety	Relative Days (DS) ▼	Shape /Color	Size	Texture	Plant Type	Resistance/ Tolerance	Features
0890122	KAMO KAMO	95	Round-Oval, Orange, Green	7"D	Broad Ribbing	Vine		A unique ornamental squash that is edible! Remarkably decorative, primary color is yellow-orange with green streaky spots between the ribs.
0890243	MORANGA	95	Flattened, Light Pink to Salmon	4-8 lbs.	Deep Ribbing	Vine		Brazilian squash is named for traditional dish 'Camarão na moranga' which means 'shrimp in a squash'. Prolific plants.
0890123	GALEUSE D'EYSINES (Peanut)	95-100	Oblate-Flattened, Pink	15-20 lbs.	Peanut Bumps	Vine		Pink with beige bumps, which resemble peanuts, covering its surface making this pumpkin-like squash truly unique!
0890133	SPECKLED HOUND (Hybrid)	95-100	Oblate, Orange, Blue, Green	3-6 lbs.	Medium Ribbing	Open Vine	ZYMV _(IR)	Unusual squash is an eye catcher for ornamental use but has a surprise of great taste. Medium orange with green to blue "splotches". Flesh is dense and yellow orange.
0890152	AUTUMN CROWN (Hybrid)	100	Flattened, Buff	4" x 9", 2-4 lbs.	Medium Ribbing	Medium Vine		Miniature Long Island Cheese type with excellent eating quality. Extremely uniform fruit with bright orange internal color.
0890236	AUTUMN FROST (Hybrid)	100	Upright, Boxy, Tan with Waxy Patina	6" x 5.5", 3.25-4 lbs.	Moderate Ribbing	Vine	Px _(IR)	Unique attractive fruit are great for decoration and are very flavorful. Good storability.
0890230	GOLDEN BUTTA BOWL (Hybrid)	100	Flat Scallop, Orange with Dark Green Stripes	9"D	Slight Ribbing	Vigorous Vine	Px _(IR) , ZYMV _(IR)	A unique, eye catching ornamental variety with great flavor! Perfect for fall decoration.
0890078	GREY GHOST (Hybrid Grey Crown)	100	Flattened Round, Grey	16-18 lbs.	Light Ribbing, Smooth	Vigorous Vine	ZYMV _(IR)	Prolific vines produce good yields of uniform fruits. Outstanding eating quality, good storage ability.
0890193	SHADOW MOON (Hybrid)	100	Oblate, Red Orange	16-18 lbs.	Moderate Ribbing	Vine		Thick, bright yellow flesh with excellent yields of large, heavy fruit. Ideal as an edible squash or novelty colored pumpkin.
0890108	AUTUMN COLORS CUSHAW (Hybrid)	105	Curved Neck, Orange, Green on White Background	4-10 lbs.	Smooth	Large Vine		Beautiful, unusual tri-colored hybrid cushaw squash! Perfect for decorating, displays or eating.
0890237	BLACK FUTSU	105	Flat Round, Dark Blue-Green Maturing to Tan	3-5 lbs.	Strong Ribbing	Medium Vine		Very good, edible squash with a waxy patina. Matures from dark green, to blue-green to tan. Fruit flesh is gold colored and has a strong hazelnut taste. Suitable for long term storage.
0890162	MARINA DE CHIOGGIA	105	Flattened Globe, Gray Green	6" x 7", 7-8 lbs.	Medium Ribbing	Vigorous Vine		Beautiful heirloom with ridges and bumps on gray-green skin that look like ocean waves. Stores well. Excellent for squash gnocchi and in Venetian markets.
0880054	PINK BANANA	105	Banana Shape, Pink	36"L x 8"D	Slight Ribbing	Vine		This cylindrical, sometimes slightly curved fruit is great for pie making. The skin turns a pinkish orange and is thin and brittle. The flesh is light orange, fine grained, sweet and stores well.
0890178	TRIANGLE	105	Triangular, Blue	6" x 7", 7-8 lbs.	Deep Ribbing	Vigorous Vine		Triangular heirloom squash with dry sweet flesh and blue skin. Perfect for baking, a great novelty.
0780187	CUSHAW ORANGE	110	Oblong Butternut, Green, Orange	20-35 lbs.	Smooth	Vine		Large fruit, skin is dark green with golden/orange mottling, turns tan in storage. Flavorful, rich sweet bright orange flesh.
0890197	CUSHAW GREEN STRIPE	112	Curved Neck, Green Stripe on Buff Background	12 lbs.	Smooth	Large Vine		Fine grained, sweet. Used for pies, canning or stock.

SUNFLOWERS (HYBRID & OPEN POLLINATED)

Item#	Variety	Relative Days (DS) ▼	Plant Height	Resistance/ Tolerance	Features
0190067	SUNBRIGHT SUPREME (Hybrid)	50 winter 70 summer	52-64"	Bc _(IR)	A pollenless, uniflora type, strong flower stems and necks for upward facing flower heads with rounded petals. Holds up extremely well in long distance shipping. Suitable for both indoor and outdoor production systems.
0190096	PROCUT WHITE NITE (Hybrid)	50-60	60-72"		Creamy pale-yellow, almost white petals on a dark center. Early and reliable. Single-stem plants have tall, strong stems and 3-4" pollenless blooms.
0190119	VINCENT'S FRESH	50-60	48-60"		Yellow with green center blooms with an extra ring of flower petals create better filled, more attractive flower heads. Well suited for producing smaller flowers for bouquets or extra large mature flowers.
0190076	VINCENT'S CHOICE	50-60	60-71"		Deep orange with brown center blooms with an extra ring of flower petals create better filled, more attractive flower heads. Well suited for producing smaller flowers for bouquets or extra large mature flowers.
0190120	SUNRICH LEMON	50-65	36"		No pollen type. Lemon yellow with a black center. Flowers are medium, large, day length neutral blooms. Sunrich colors mature 60 days from seeding till bloom.
0190078	TEDDY BEAR	50-65	18-24"		Beautiful 3-6" blooms. Petals are a beautiful golden yellow. Double blooms make it soft and bushy.
0190080	STRAWBERRY BLONDE (Hybrid)	55	60-72"		Pollenless flowers have burgundy, sometimes pink petals with lemony tips and dark centers. Branching plants have long, 18-24" strong side stems for cutting.
0190092	SUNRICH ORANGE DMR (Hybrid)	55-70	35-59"	Ph _(HR)	Downy Mildew resistance provides substantial benefits with high yield results and the reduction of chemical use. Flowers are pollenless, long-lasting, densely petaled and upright facing on strong stems.
0190088	AUTUMN BEAUTY	60-70	60-84"		Attractive 4-5" flowers in a color range including shades of yellow, bronze, and red.
0190086	MOULIN ROUGE (Hybrid)	65-80	60-80"		Exquisite, deep-burgundy petals surround an ebony center. A pollenless, branching variety with 3-4" blooms.
0190090	GIANT GREY STRIPED	75-90	6-12'		Heads average to 12-20" but can get larger. Large plump grey striped seeds. Great used as windbreak or screen. Seeds are good roasted and are high protein for chicken or bird feed.

SWISS CHARDS (HYBRID & OPEN POLLINATED)

Item#	Variety	Relative Days (DS) ▼	Height	Leaf Type	Stem Type	Resistance/Tolerance	Features
0920021	FIRE FRESH (Hybrid)	25-35 Baby	20-26"	Vivid Green, Bright Red Veins	Bright Red	Cb ^(HR) , Ps ^{1(IR)}	Adds bold color to baby leaf salads, spring mixes, or stir-fries. Crunchy leaves are round to oval with a slight texture. Fast-growing plants have an upright habit that keeps the leaves clean for harvest. Leaves hold their color and resist the leaf minor damage that discolors other leafy crops. For best results use in baby leaf production only.
0920019	BRIGHT LIGHTS	28 Baby, 55 Bunching	12-16"	Multi-Colored, Crinkled	Multi-Colored		Lightly savoyed, green or bronze leaves with stems of many colors including gold, pink, orange, purple, red, and white with bright and pastel variations. The flavor is milder than ordinary chard, with each color a bit different. Direct seed or grow from transplant which allows separating out the individual colors. Suitable for production year round, but somewhat less frost hardy than normal for chard.
0920017	CELEBRATION	58-63	30"	Dark Green, Glossy, Semi-Savoy	Multi-Colored	Ps ^(IR)	Vibrant multi-colored chard that exhibits highly uniform plants with dark green, glossy leaves, and a high percentage of bright colors with few whites. Can be used as ornamental.
0920001	LARGE WHITE RIBBED	58	20-26"	Dark Green, White Veins	Broad, Smooth, White Petioles		Excellent market variety. Uniform strain.
0920006	RAINBOW	60	22-26"	Multi-Colored Crinkled	Multi-Colored		Red, pink, yellow, orange & green stems. Good taste.
0920002	RHUBARB	60	20-24"	Deep Green, Red Veins, Savoy	Bright Red, Slightly Flattened		Fine quality strain for fresh market.
0920004	SILVERADO	60	14-16"	Dark Glossy Green, Deeply Savoy	Broad, White		Fine taste. Compact for ease in packaging. Slow to bolt.
0920007	VIRGO	65	13.5-14"	Bright Green, Semi-Savoy	Silver, 3-4" wide		Beautifully colored shiny, medium-blistered leaves on wide stalks.

Full Count®

Plant program

Transplants you can count on!
Choice, Flexibility, Simplicity

The Full Count® Plant Program has changed the way watermelon growers across the U.S. prepare for their season. Since its beginning in 2002, Full Count has established itself as the leading supplier of quality transplants in the watermelon industry. Full Count provides Syngenta genetics to every major U.S. production region from preferred transplant producers that growers can depend on.

The Full Count Deuces and Full Count Duals companion transplant programs can help you increase the efficiency of your transplant operations and reduce labor costs even more. Syngenta combines the best of its patented technologies: Syngenta seedless watermelon varieties and Super Pollenizer™ varieties into one transplant plug. Syngenta is redefining the way the industry transplants watermelons: fast, easy, and cost-efficiently.

Full Count® Your number one source and provider for
the latest plant production technology.

*Minimum order of 10,000 plants.

Call your local Seed Consultant today (page 1) for more details on Syngenta's Full Count Plant Program.

Spacing of Mini Watermelons

Achieving the correct size for the "personal" watermelon market is dependent on genetics, spacing and weather conditions. However, even with the right genetics, higher plant populations are recommended to achieve uniform smaller size.

Generally, our trials have shown that the optimum spacing for mini watermelons is 6-8 square feet. For example, if your rows are spaced four feet apart, then your plants should be spaced 18 to 24 inches apart in the row. For other row spacings, adjust your linear spacing accordingly. Experimentation may be needed with each variety to determine optimum spacing, nutrition, irrigation and harvest time for your specific growing conditions.

Conditions of Sale

Definition of the Terms Describing the Reaction of Plants to Pests

Susceptibility is the inability of a plant variety to restrict the growth and/or development of a specified pest.

Resistance is the ability of a plant variety to restrict the growth and/or development of a specified pest and/or the damage it causes when compared to susceptible plant varieties under similar environmental conditions and pest pressure. Resistant varieties may exhibit some disease symptoms or damage under heavy pest pressure. Two levels of resistance are defined.

High resistance (HR): plant varieties that highly restrict the growth and/or development of the specified pest and/or the damage it causes under normal pest pressure when compared to susceptible varieties. These plant varieties may, however, exhibit some symptoms or damage under heavy pest pressure.

Intermediate resistance (IR): plant varieties that restrict the growth and/or development of the specified pest and/or the damage it causes but may exhibit a greater range of symptoms or damage compared to high resistant varieties. Intermediate resistant plant varieties will still show less severe symptoms or damage than susceptible plant varieties when grown under similar environmental conditions and/or pest pressure.

Varieties claiming the same level of resistance against a specific pest may exhibit a different resistance response due to a different genetic makeup of a variety. It is to be noted that if a resistance is claimed in a plant variety it is limited to the specified biotypes, pathotypes, races or strains of the pest. If no biotypes, pathotypes, races or strains are specified in the resistance claim for the variety, it is because no generally accepted classification of the cited pest by biotype, pathotype, race or strain exists. In this case resistance is only claimed against certain not further specified isolates of that pathogen. New biotypes, pathotypes, races or strains that may emerge are not covered by the original resistance claim.

Immunity is when a plant is not subject to attack or infection by a specified pest.

Tolerance (T) is the ability of a plant variety to endure abiotic stress without serious consequences for growth, appearance, and yield.

Please Read This Live Product Warranty Before Ordering Our Seed

NOTE: Seed is a live product which depends on many important related grower skills such as proper planting time, seed depth, type of soil, irrigation, proper use of fertilizers, weed controls, fungicides, insecticides, disease free soil, and reasonable weather conditions during the growing period. These factors are totally out of the seedsman's control and are the grower's responsibility and risk. Our seed cannot be unconditionally guaranteed to perform properly - regardless of weather conditions or the grower's methods or mistakes

Notice to Buyer - Stokes Warranty and Conditions of Sale

Stokes Seeds Ltd., and/or Stokes Seeds Inc., and/or Semences Stokes Ltée., and their suppliers, (herein after collectively referred to as the vendor "Stokes") warrants that the seed it sells conforms to the label description as required by Provincial and/or State and Federal Seed Laws. Stokes limits its warranty to the full amount of the purchase price of such seeds. STOKES MAKES NO OTHER WARRANTIES, GUARANTEES OR CONDITIONS EXPRESS OR IMPLIED OF THE MERCHANTABILITY, FITNESS FOR PARTICULAR PURPOSE OR OTHERWISE OF THE SEED SOLD BY IT OR THE CROPS GROWN FROM SUCH SEEDS. It is recognized that a mistake or human error can be made in the production, processing or packaging of such seed, therefore, in any event, direct or consequential on account of any negligence whatsoever - IF A BREACH OF WARRANTY, CONDITION OR CONTRACT OCCURS WITH RESPECT TO SUCH SEEDS - THAT IN NO CASE SHALL STOKES BE LIABLE FOR MORE THAN THE PRICE ACTUALLY INVOICED AND/OR PAID FOR SUCH SEEDS BY THE PURCHASER TO THE VENDOR AND/OR THE VENDOR'S AGENT. As a condition to any liability, Stokes must receive notice by registered mail of any claim that the seed is defective within 30 days after the defect in the seed became apparent. Stokes has based the prices of its seeds on this limited warranty and limited liability and these prices would be much higher if further liability coverage were required. These warranties and limitations of liability may not be altered or amended except by an instrument in writing executed by duly authorized officers of Stokes and stamped with the company seal. By acceptance of such seeds, the Purchaser of such seeds acknowledges that this limited warranty and disclaimer herein before described, are conditions of sale and that they constitute the entire agreement between the Vendor and the Purchaser regarding warranty and/or any other liability or conditions.

IF THIS LIMITED WARRANTY AND GUARANTEE IS NOT ACCEPTABLE TO THE PURCHASER AS A CONDITION OF SALE - THEN THE PURCHASER MUST NOT PLANT THE SEEDS AND MUST RETURN THE SEEDS IN THEIR ORIGINAL UNOPENED PACKAGE, and the purchase funds shall be refunded.

Notice: Arbitration / Conciliation / Mediation Required by Several States

Under the seed laws of several states, arbitration, mediation or conciliation is required as a prerequisite to maintaining a legal action based upon the failure of seed to which this notice is attached to produce as represented. The consumer shall file a complaint (sworn for AL, AR, CO, FL, IN, MN, MS, SC, TX, WA; signed only CA, GA, ID, MT, ND, NV, RI, SD) along with the required filing fee (where applicable) with the Commissioner/Director/Secretary of Agriculture, Seed Commissioner, or Chief Agricultural Officer within such time as to permit inspection of the crops, plants or trees by the designated agency and the seedsman from whom the seed was purchased. A copy of the complaint shall be sent to the seller by certified or registered mail or as otherwise provided by state statute.

**NOTICE, WAIVER AND COMPLETE RELEASE AGREEMENT, INCLUDING
LIMITATION OF WARRANTY AND LIMITATION OF LIABILITY (GROWER)
NOT RECOMMENDED FOR PLANTING IN SOUTH CAROLINA**

Watermelon Fruit Blotch (WFB), caused by Acidovorax avenae subsp. citrulli, and Gummy Stem Blight (GSB), caused by the fungus Didymella Bryoniae are serious diseases which have become a significant risk factor in many areas where watermelons are grown. The pathogens causing WFB and GSB can be introduced into a field by infested seed, infected transplants, volunteer watermelon, mechanical means, or natural spread from alternate hosts.

1. GROWER'S RELEASE OF ALL LIABILITY FOR WATERMELON FRUIT BLOTCH AND GUMMY STEM BLIGHT (GSB). Acknowledging the above, GROWER still wishes to purchase watermelon seeds from Stokes Seeds Limited or Stokes Seed Company of Niagara Falls Inc. (jointly referred as STOKES SEEDS), and GROWER is willing to assume all risks or loss associated with WFB and GSB. Accordingly, GROWER hereby FULLY AND UNCONDITIONALLY RELEASES STOKES SEEDS AND ITS SUPPLIERS FROM ANY AND ALL LIABILITY WITH RESPECT TO THE PRESENCE OF WFB AND GSB ON OR WITHIN SUCH SEEDS OR THE VULNERABILITY OF SUCH SEEDS, TO THE WFB AND GSB. GROWER ACKNOWLEDGES AND AGREES THAT STOKES SEEDS AND ITS SUPPLIERS SHALL HAVE NO RESPONSIBILITY OR LIABILITY FOR ANY LOSSES OR DAMAGES RELATING IN ANY WAY TO WFB AND GSB, UNDER ANY LEGAL THEORY INCLUDING BUT NOT LIMITED TO NEGLIGENCE OR STRICT PRODUCTS LIABILITY. STOKES SEEDS acknowledges that all other aspects of its express warranty, as contained on its label, do apply, and that any waiver or limitation on the STOKES SEEDS express warranty resulting from the terms and conditions of this Agreement, only apply to the presence on or with vulnerability of, such seeds, to WFB and GSB. GROWER further agrees that Stokes Seeds and its suppliers have no liability or responsibility for its watermelon seeds or plants grown therefrom, if they are contaminated with WFB and GSB after the seeds are delivered to grower. GROWER acknowledges that contamination may occur in transplant house, in the field, or under circumstances beyond the control of Stokes Seeds.
2. GROWER'S AGREEMENT NOT TO RESELL SEEDS OR PLANTS. In consideration for STOKES SEEDS, or its authorized suppliers, agreeing to sell watermelon seeds to GROWER, GROWER hereby agrees that it/he will only use such seeds for plantings on its/his own holdings, and will not, under any circumstances, sell, transfer, distribute or in any way dispose of any such seeds or seedlings grown from the seeds, with or without consideration, to any third party. To the extent that GROWER does not utilize all such watermelon seeds purchased from STOKES SEEDS, all such unopened containers may be returned to STOKES SEEDS or its authorized suppliers, within six (6) months from the date of initial purchase for a refund of the purchase price.
3. GROWER'S INDEMNIFICATION AGREEMENT. GROWER acknowledges that in the event it/he breaches the terms and conditions of paragraph 2, this Agreement, with respect to the distribution of any such watermelon seeds to a third party, STOKES SEEDS and authorized STOKES SEEDS suppliers could incur liability to such third parties. THEREFORE, GROWER HEREBY UNCONDITIONALLY AGREES TO DEFEND AND INDEMNIFY STOKES SEEDS, AND ANY AUTHORIZED STOKES SEEDS SUPPLIERS, FROM ANY AND ALL LOSS, LIABILITY, OR DAMAGE WHICH STOKES SEEDS, OR STOKES SEEDS SUPPLIERS, MAY INCUR, INCLUDING, BUT NOT LIMITED TO REASONABLE ATTORNEY'S FEES, RELATING TO ANY CLAIM BY A THIRD PARTY WHO RECEIVED ANY PORTION OF THE WATERMELON SEEDS WHICH ARE COVERED BY THIS AGREEMENT AS SOLD BY STOKES SEEDS TO GROWER.
4. GROWER UNDERSTANDS THIS AGREEMENT. GROWER represents and warrants that it/he has consulted with or had an opportunity to consult with an attorney, and that GROWER fully understands the meaning and legal effect of this Agreement.
5. ALL OTHER TERMS OF THE STOKES SEEDS LABEL APPLY. Except as expressly provided within this Agreement, all remaining terms, disclaimers, limitations, and conditions of purchase as disclosed and set forth on the STOKES SEEDS label and on the STOKES SEEDS NOTICE TO PURCHASE REGARDING LIABILITY shall apply to all of GROWER's purchases of watermelon seed.
6. CHOICE OF LAW AND CHOICE OF FORUM. The parties agree that this Agreement is entered into in the City of St. Catharines, in the province of Ontario, and shall be construed in accordance with the laws of the Province of Ontario. It is further agreed that any litigation by and between GROWER and STOKES SEEDS, relating to the sale of all such watermelon seeds hereunder, shall take place in St. Catharines, Ontario, Canada.
7. ATTORNEY'S FEES. In the event that STOKES SEEDS enforces any terms of this Agreement in any litigation with GROWER, STOKES SEEDS shall be entitled to recover reasonable attorney's fees from GROWER.

**NOTICE, WAIVER AND COMPLETE RELEASE AGREEMENT, INCLUDING
LIMITATION OF WARRANTY AND LIMITATION OF LIABILITY (GROWER)
NOT RECOMMENDED FOR PLANTING IN SOUTH CAROLINA**

Stokes Seeds and its suppliers require a signed waiver on watermelon seed orders. Please follow the instructions below to ensure the process is completed correctly.

Instructions:

1. Contact customer service to receive supplier waivers (if applicable) at (800) 962-4999
2. Read all information contained in these documents carefully.
3. Please feel free to consult a lawyer before signing.
4. Ensure you have filled out and signed the required fields on **ALL** documents.
5. Make a copy of the signed forms to keep for your personal records.
6. Send **ONE** signed copy of all documents **including supplier waiver (if applicable)** to Stokes Seeds using one of the following methods:

Email: customerservice.us@stokeseeds.com
Fax: (877) 994-0333

US Post: Stokes Seeds Inc.
13031 Reflections Drive
Holland, MI 49424

If you have any questions or require clarification on the attached forms
please contact our Customer Service Department at (800) 962-4999.

**I have read and understand this release agreement
and I agree to be bound by all of its terms.**
